CITY OF Federal Way

Certificate of Recognition

Presented to:

Chief Vic Pennington

On behalf of the Elected Officials and Residents of Federal Way, Washington, in recognition of his dedicated service to the people of South King County as Fire Chief of South King Fire and Rescue and more than 44 years of public service protecting lives and property.

Dated this 1st day of March, 2022

Jim Ferrell, Mayor	Linda Kochmar, Council President

Susan Honda, Deputy Mayor	Lydia Assefa-Dawson, Councilmember	Erica Norton, Councilmember
Hoang V. Tran, Councilmember	Jack Walsh, Councilmember	Jack Dovey, Councilmember

CITY OF
Federal Way

PROCLAMATION
"Celebrating Women in Public Office Day"
Providing Healing, Promoting Hope

WHEREAS, the month of March is Women's History Month and celebrates the significant contributions women of all races, ethnicities, and backgrounds have made to the world;

WHEREAS, women play a critical role in the vitality and diversity of our communities, and are essential to ensuring Federal Way is well-represented;

WHEREAS, while the twentieth century was a pivotal time of growth for women entering politics, women remain underrepresented in male-dominated fields, and thus, providing opportunities to support women in public office is imperative;

WHEREAS, recognizing women in public office will bring awareness to the fundamental necessity of their work and will inspire other young people to serve their communities;

WHEREAS, we recognize the many ways in which women have provided healing and hope to humanity for countless generations; and

NOW, THEREFORE, we, the undersigned Mayor and City Council of the City of Federal Way, do hereby proclaim March 19th, to be Celebrating Women in Public Office Day and call upon the people of Federal Way to unite as we support the success of women in public office.

SIGNED this 1st day of March, 2022.

FEDERAL WAY MAYOR AND CITY COUNCIL

Jim Ferrell, Mayor

Linda Kochmar, Council President

Susan Honda, Deputy Mayor

Lydia Assefa-Dawson, Councilmember

Erica Norton Councilmember

Hoang V. Tran, Councilmember

Jack Walsh, Councilmember

Jack Dovey, Councilmember

CITY COUNCIL

REGULAR MEETING MINUTES

City Hall – Council Chambers*

***remote attendance option available via zoom**

February 15, 2022 – 6:30 p.m.

1. CALL MEETING TO ORDER

Mayor Ferrell called the meeting to order at 6:30 p.m.

City officials in attendance: Mayor Jim Ferrell, Council President Linda Kochmar, Deputy Mayor Susan Honda, Councilmember Lydia Assefa-Dawson, Councilmember Erica Norton, Councilmember Hoang Tran, Councilmember Jack Walsh, and Councilmember Jack Dovey.

City staff in attendance: Interim City Administrator Brian Davis, City Attorney Ryan Call and City Clerk Stephanie Courtney.

2. PLEDGE OF ALLEGIANCE

Mayor Ferrell led the flag salute.

3. PRESENTATIONS

a. Certificates of Appointment – Human Services Commission

Councilmember Walsh read the Certificates of Appointment and congratulated the newly reappointed members of the Human Services Commission.

b. Certificate of Appointment – Planning Commission

Councilmember Dovey read the Certificate of Appointment and congratulated the new alternate member of the Planning Commission.

c. Certificate of Appointment – Independent Salary Commission

Council President Kochmar read the Certificate of Appointment and congratulated the new member of the Independent Salary Commission.

d. Certificate Mayor's Emerging Issues and Report

Mayor Ferrell announced the State of the City Address will be Thursday, February 24 at 6:00 p.m. and can be viewed on the city's YouTube Channel (FWYouTube) or through the government access channel 21 via Comcast. He also noted the Council would be holding

the Annual Retreat on Saturday, February 26 beginning at 8:30 a.m. at City Hall.

The Mayor was pleased to announce the temporary appointment of Interim City Administrator Brian Davis. He congratulated Mr. Davis who was recently a final City Manager candidate for another local jurisdiction.

Mr. Davis thanked the Mayor and Council for the opportunity of this new role while also maintaining his current position of Community Development Director.

e. Council Committee Reports

Parks/Recreation/Human Services/Public Safety Committee (PRHSPS): Councilmember Walsh reported the next meeting will be Tuesday, March 8 in Council Chambers.

Land Use/Transportation Committee (LUTC): Councilmember Dovey reported the next meeting will be Monday, March 2 in Council Chambers.

Finance, Economic Development Regional Affairs Committee (FEDRAC): Councilmember Tran reported the next meeting will be Tuesday, February 22 via Zoom.

Lodging Tax Advisory Committee (LTAC): Councilmember Assefa-Dawson had no report and noted the Committee is currently working on recruiting for vacant positions.

Deputy Mayor and Regional Committees Report: Deputy Mayor Honda reported on her attendance at various regional meetings including the Public Issues Committee (PIC) and South County Area Transportation Board Meeting where regional transportation planning was discussed. She welcomed the new City Council Executive Assistant to the city and reminded everyone the Council Retreat will be held at City Hall on Saturday, February 26 beginning at 8:30 a.m.

Council President Report: Council President Kochmar encouraged residents to watch the Council Retreat on February 26 via FWTV Channel 21 or FWYoutube Channel; the agenda is full with many items to be discussed. She reported the Multi-Service Center needs volunteers. She acknowledged the increase in crime and feels the city and retailers are working together; she asked for concerned residents to contact Council.

4. PUBLIC COMMENT

Craig Patrick shared details about the upcoming Irish Flag raising taking place at City Hall March 17 in honor of Saint Patrick's Day, inviting all to attend. He would like to see similar events for other cultures represented in the city.

Jim Grayson shared his personal highlights and appreciation of the City of Federal Way including the Police Department, parks, city events, library system, tourist attractions, and restaurants in the area. He believes there are many attributes of Federal Way to be proud of and would like to see residents work together.

Debbie Peterson asked Council to prioritize the use of ARPA funds for those who are unable to speak for themselves, including babies and families in Federal Way.

Helen Kubik spoke regarding the downtown revitalization discussions. She proposed the City consider building high rise condos in downtown Federal Way, including retail and restaurants

on the bottom floor where people would be able to work and live downtown.

Ken Blevens noted his continued concern for the increased crime. He would like to see the newly-elected Council continue to fight to make sure Federal Way comes first and is not at the will of King County policies. He would like a crime update and also suggested criminalizing stolen shopping carts.

> Mayor Ferrell asked Chief Hwang to provide a crime update at the next Council meeting.

Geoffrey Tancredi shared his concerns regarding the Federal Way School District; he proposes a robust expansion of Jr. ROTC program. Mr. Tancredi also feels the school district is failing the young people and encouraged parents to look at other options including establishing Charter Schools.

Nancy Justice expressed concern regarding redevelopment of the old Bally's property. She received a notice in the mail that indicated building may be occurring there and requested more information on the plan for that area.

Dara Mandeville spoke about the People's Harm Reduction Alliance, which provides needles and other items to drug users. She raised awareness that they are continuing to operate in Federal Way and offer products such as meth pipes and heroin cookers. She would like an update on the Extended Stay project where King County will be housing the homeless.

Anna Patrick shared her gratitude for the recent Coffee with Council and feels the unscripted organic discussions are helpful; she is still concerned and would like to have input from the school district. Ms. Patrick expressed concerns around gun violence and re-zoning legislation.

Anisah Rogers, the founder of Black Street Union at Federal Way Public Academy, feels John Conna and his legacy should be recognized for his contribution to Federal Way by having a street named after him.

Trenise Rogers shared the history of Mr. Conna's contributions and accomplishments to Federal Way and the region dating back to 1883. She advocated to recognize his legacy by naming a street in Federal Way after John Conna.

> Councilmembers asked to have this request forwarded to a Council Committee for further evaluation and discussion.

Jackie Adams was disheartened by a specific online post that was referenced in the Federal Way Mirror. She expressed a desire to see the Council work together in a professional manner to protect the citizens of Federal Way.

Letter from Deborah Osborne read by the City Clerk asking council to consider naming a street after John Conna.

5. CONSENT AGENDA

a. Minutes: February 1, 2022 Regular and Special Meetings

b. Selection Process: 2022 Amendments to the Comprehensive Plan

c. Authorization to Apply for Conservation Futures Tax Levy (CFT) Grant

d. 2022 Asphalt Overlay Project Approval to Award

e. 2021 Asphalt Overlay Project – Authorization to Increase Contract Expenditures
f. 2022 Citywide Storm Repair Phase 4 Approval to Bid
g. 2020 Citywide Storm Repair Phase 3 – Project Acceptance
h. Citywide Fiber Loop Project – 30% Presentation
i. 2021 Citywide Pavement Repair Project – Final Acceptance
j. 2020-2021 Neighborhood Traffic Safety (NTS) Program – Contract Increase
k. WSDOT Operations and Maintenance Agreement for Adaptive Traffic Control System
l. Transportation Grants Funding Applications
m. Contract Increase for Concreate Beveling Services – Trip Hazard Removal Contract
n. Summer Experience and Enrichment for Kids Grant
o. Parks & Recreation Commission 2022 Work Plan
p. Cummins, Inc. Generator Maintenance and Repair Agreement

Councilmember Dovey requested to pull item b.

COUNCIL PRESIDENT KOCHMAR MOVED APPROVAL OF ITEMS A AND C THROUGH P ON THE CONSENT AGENDA; SECOND BY COUNCILMEMBER ASSEFA-DAWSON. The motion passed unanimously as follows:

Council President Kochmar	*yes*	*Councilmember Tran*	*yes*
Deputy Mayor Honda	*yes*	*Councilmember Walsh*	*yes*
Councilmember Assefa-Dawson	*yes*	*Councilmember Dovey*	*yes*
Councilmember Norton	*yes*		

Item b/ Selection Process: 2022 Amendments to the Comprehensive Plan.

Councilmember Dovey noted he pulled this item to clarify this is part of the process to study this one property that has requested a re-zone.

Community Development Director Brian Davis concurred and added this is the first step of analyzing the request. Taking final action on this request would come after a very lengthy public process. At the request of Deputy Mayor Honda, Mr. Davis also clarified how the public can officially submit comments and become a part of the record.

COUNCIL PRESIDENT KOCHMAR MOVED APPROVAL OF ITEM B ON THE CONSENT AGENDA; SECOND BY COUNCILMEMBER HOANG. The motion passed unanimously as follows:

Council President Kochmar	*yes*	*Councilmember Tran*	*yes*
Deputy Mayor Honda	*yes*	*Councilmember Walsh*	*yes*
Councilmember Assefa-Dawson	*yes*	*Councilmember Dovey*	*yes*
Councilmember Norton	*yes*		

6. PUBLIC HEARING

Mayor Ferrell opened the public hearing at 7:29 p.m.

a. Council Bill #812/Amending Title 19 of the FWRC regarding Public Transportation Facilities (*postponed from October 19, 2021 & January 18, 2022*)

Community Development Director Brian Davis provided background and history on this item noting there have been thorough discussions and negotiations with Sound Transit regarding the south Light Rail Station, which has proposed to have a parking garage built in a much later phase.

This ordinance narrows definitions and language where the code was previously overly broad. Light Rail and Commuter Rail are now allowed in two zones (Core and Commercial Enterprise Zones). He provided the baseline parking requirements, how they will be met, and the anticipated timeline.

Mayor and Councilmember thanked Mr. Davis and his staff for working on this important infrastructure for the city and finding middle ground with Sound Transit.

Mr. Davis and Public Works Director EJ Walsh addressed additional questions regarding baseline parking for this location and for the downtown station.

No public comments were received.

COUNCILMEMBER DOVEY MOVED TO CLOSE THE PUBLIC HEARING; SECOND BY COUNCILMEMBER ASSEFA-DAWSON. The motion passed unanimously as follows:

Council President Kochmar	*yes*	*Councilmember Tran*	*yes*
Deputy Mayor Honda	*yes*	*Councilmember Walsh*	*yes*
Councilmember Assefa-Dawson	*yes*	*Councilmember Dovey*	*yes*
Councilmember Norton	*yes*		

Mayor Ferrell noted action on this ordinance will take place later in the meeting under agenda item 8a.

7. COUNCIL BUSINESS

a. Downtown Revitalization Plan Discussion

Community Development Director Brian Davis provided an opportunity for the Council to provide feedback on their ideas for downtown revitalization. Councilmembers asked staff to engage with the mall owners and Sound Transit for a possible combined discussion and collective plan.

In response to a question regarding the intention of the mall property, Mr. Davis noted while staff have been in continual communication with the mall, the requests from mall ownership include requests to waive requirements to allow development of additional dwelling units (apartments) while leaving Amazon, Target, and surface level parking intact.

Council would like to see downtown change from the sea of parking lots to a denser footprint; a reference was included to the recently redeveloped Point Ruston on Tacoma's waterfront.

b. Authorization for Request for Proposal for Town Center 3 (former Target Property)

Interim City Administrator Brian Davis provided background on the policy question of moving forward with a Request for Proposals for the City-owned TC3 properties as previously budgeted. The TC3 property consists of 2 parcels east of the Performing Arts

and Event Center. It is recommended the PAEC's north parking lot be included in the study to include 8.7 acres.

The study would review the property and the needs in order to provide the best use of the property, which would include parking.

Mr. Davis provided a brief history of the property which includes the former Target building and associated parking. He noted the city purchased the properties in 2014 for the purposed of catalyzing redevelopment of the City's Downtown which could have otherwise been purchased and land-banked by an investor.

Councilmembers thanked Mr. Davis for the presentation and asked various clarifying questions including the cost of the study, timeline, and if including PAEC parking in the study, would result in less parking.

Mr. Davis stated this study will provide the best use of the property and account for the market, possible public use, parking, or possible investor development.

In response to questions related to the Sound Transits station currently under construction, Public Works Director EJ Walsh stated timing is imperative so that the city is not playing catchup to the decisions Sound Transit is making for their property. Mr. Walsh agrees with Mr. Davis and sees no downside in moving forward with the study as budgeted.

COUNCILMEMBER DOVEY MOVED THE CITY ISSUE A REQUEST FOR PROPOSALS FOR THE CITY-OWNED TC-3 PROPERTY TO FACILITATE THE REDEVELOPMENT OF THAT SITE; SECOND BY COUNCILMEMBER KOCHMAR. The motion passed 5-2; Dovey and Norton dissenting.

Council President Kochmar	*yes*	*Councilmember Tran*	*yes*
Deputy Mayor Honda	*yes*	*Councilmember Walsh*	*yes*
Councilmember Assefa-Dawson	*yes*	*Councilmember Dovey*	*no*
Councilmember Norton	*no*		

At 8:25 p.m. Mayor Ferrell announced a brief recess for approximately ten (10) minutes. Council returned to Chambers at 8:36 p.m.

c. Monetary Retention Incentive for City Employees

Interim City Administrator Brian Davis, provided background on this proposal noting it was originally developed for Police Officers and was expanded to include all regular full and part-time employees. Employee retention across the city has been a consistent and expensive issue for the city due to many factors including special hazards faced by staff during the pandemic due to higher risk of exposure and increased wages and better working conditions offered by other local cities luring employees away for other public service positions.

Mr. Davis provided the information for the Mayor's recommendation which includes a 2.5% monetary retention incentive to be paid as a qualifiable use of ARPA funds for 2022 and 2023 to staff who work a minimum of 1,250 hours during the given year. The percentage would be calculated from the base salary, and not include overtime or specialty pay.

Councilmembers thanked Mr. Davis for his presentation noting their desire to support staff and improve retention. Clarifying questions were asked regarding the overall financial position of the city. Mr. Davis recognized the praised the increases Council has made for staff including implementing the salary study as well as an increased COLA, but notes the city is behind neighboring jurisdictions who continue to offer more in salary, COLA and alternative working

conditions/schedules.

Council further discussed and noted the incentive payment would be made from one-time ARPA funds, not by increasing taxes. Additional options and data were requested including a flat rate incentive for all employees (instead of a percentage).

COUNCILMEMBER WALSH MOVED APPROVAL OF THE PROPOSED MONETARY RETENTION INCENTIVE FOR ALL CITY EMPLOYEES IN 2022 AND 2023; SECOND BY COUNCILMEMBER DOVEY.

Councilmembers continued the debate a flat rate incentive versus a percentage of salary, noting they would prefer more options to review to ensure it is fair and equitable.

It was suggested a higher earning position, which is more difficult to fill, and train, would likely not be retained by a flat rate incentive of $1,500. Consensus was not reached and additional questions were raised about holistically reviewing staff wages and working conditions such as telecommuting or flex-schedule options. Council agreed this issue needs further data to outline multiple options for action at a future meeting.

Dovey removed his second; main motion fails for a lack of second.

COUNCIL PRESIDENT KOCHMAR MOVED TO CONTINUE THIS ITEM WHEN THE INFORMATION CAN BE BROUGHT BACK AT THE NEXT COUNCIL MEETING AND THAT INFORMATION WOULD BE TWO DIFFERENT PROPOSALS: THE 2.5% VERSUS A SET AMOUNT PER EMPLOYEE NOT TO EXCEED THE AMOUNT OF MONEY AVAILABLE THROUGH THE ARPA FUND; SECOND BY DEPUTY MAYOR HONDA.

Council stated they would like the proposals to include pro-rata for new employees hired after January 1st and would like to review the working conditions (telecommute policy). Mayor Ferrell clarified city staff working conditions are at the direction of the Executive, and are not set by the City Council, and therefore cannot be included in this discussion.

The motion passed unanimously as follows:

Council President Kochmar	*yes*	*Councilmember Tran*	*yes*
Deputy Mayor Honda	*yes*	*Councilmember Walsh*	*yes*
Councilmember Assefa-Dawson	*yes*	*Councilmember Dovey*	*yes*
Councilmember Norton	*yes*		

8. ORDINANCES

First Reading

a. Ordinance: Council Bill #812/Amending Title 19 of the FWRC regarding Public Transportation Facilities (postponed from October 19, 2021 & January 18, 2022)
AN ORDINANCE OF THE CITY OF FEDERAL WAY, WASHINGTON, RELATING TO PUBLIC TRANSPORTATION FACILITES; AMENDING FWRC 19.05.120, 19.05.200, AND 19.105.020; AND ADDING NEW SECTIONS TO CHAPTERS 19.225 AND 19.240 FWRC. (Amending Ordinance Nos. 17-834, 15-804, 09-630, 09-610, 09-593, and 97-295)

The staff report was presented during the public hearing earlier in the meeting.

No public comment was received.

The City Clerk read ordinance title into the record.

COUNCILMEMBER DOVEY MOVED TO FORWARD THE PROPOSED ORDINANCE TO THE MARCH 1, 2022 COUNCIL MEETING FOR SECOND READING AND ENACTMENT; SECOND BY COUNCILMEMBER ASSEFA-DAWSON The motion passed unanimously as follows:

Council President Kochmar	*yes*	*Councilmember Tran*	*yes*
Deputy Mayor Honda	*yes*	*Councilmember Walsh*	*yes*
Councilmember Assefa-Dawson	*yes*	*Councilmember Dovey*	*yes*
Councilmember Norton	*yes*		

9. COUNCIL REPORTS

Councilmember Dovey reported on an ad hoc meeting he attended with residents from Federal Way discussing better connecting neighborhoods together; and noted there would be more to come.

Councilmember Walsh provided no report.

Councilmember Tran announced that the DSHS office located on S 348 Street will be opening for full service at the end of February.

Councilmember Norton reported on the recent Coffee with Council sharing that there was good discussion and that she looks forward to next month's meeting.

Councilmember Assefa-Dawson attended the same meeting as Councilmember Dovey and she is in support of the proposal.

Deputy Mayor Honda encouraged residents to support the Federal Way Senior Center food drive in the month of February. Donations can be dropped off at the Tool Library on S 340 Street or donors can call 253-237-2290 to have their donations picked up. She encouraged the King County Executive to consider ending the proof of vaccine program as it is hurting businesses. Lastly, she spoke regarding the 80th Anniversary of Executive Order 9066, issued by President Roosevelt in February 1942, ordering Japanese immigrants to live in internment camps during WWII.

Council President Kochmar announced they would be meeting with the school board, although the details are not yet identified, she believes this is a good step forward. She recently was made aware of a new company locating to Federal Way in the former Weyerhaeuser area that will employ 800 people.

10. ADJOURNMENT

There being nothing further on the agenda; the regular meeting was adjourned at 9:30 p.m.

CITY COUNCIL
SPECIAL MEETING MINUTES
City Hall – Council Chambers*
***remote attendance option available via zoom**
February 15, 2021 – 5:00 p.m.

1. CALL MEETING TO ORDER

Mayor Ferrell called the meeting to order at 5:02 p.m.

City officials in attendance: Mayor Jim Ferrell, Council President Linda Kochmar, Deputy Mayor Susan Honda, Councilmember Lydia Assefa-Dawson, Councilmember Erica Norton, Councilmember Hoang Tran, Councilmember Jack Walsh, and Councilmember Jack Dovey.

City staff in attendance: City Attorney Ryan Call and City Clerk Stephanie Courtney

2. PLEDGE OF ALLEGIANCE

Mayor Ferrell led the flag salute.

3. STUDY SESSION – AMERICAN RESCUE PLAN ACT (ARPA) REPORT

Interim City Administrator Brian Davis presented history and background on the American Rescue Plan Act (ARPA) which was created to mitigate the economic impact of COVID; rebuild cities financial stability; and recover and restore sustained fiscal health. ARPA funds are one-time funds to match one-time expenses for prioritized citywide services over four years. He noted when applying these funds, the city should avoid creating recurring obligations and audit refund risks.

Mr. Davis explained the city has calculated lost revenue and captured a list of potential uses along with confirming Treasury eligibility rules. The Council will need to review the options and prioritize the requests. He further noted the funds were received in May 2021 and the Treasury's Final Rule was issued January 10, 2022. Included in the allowable expenses is standard allowance of $10 million for lost revenue; capital expenditure allowance for COVID-related health or economic response; hazard premium pay for public employees; restoration of pre-pandemic employment; expansion of broadband eligibility; and expansion of water and sewer remediation.

He provided priorities which have already had Council approval including the calculated lost revenue; administrative grant-related costs; essential workers (grocery) hazard pay; and broadband/infrastructure. The balance of the funds available can be used for public health & economic impacts.

Mr. Davis overviewed the list of items which total the lost revenue amount of $14,512,696. Staff recommendation is to continue to allocate lost revenue cautiously; maximize ARPA grand funds with public safety; and pursue community assistance option.

Council thanked Mr. Davis for the presentation and information. Clarifying questions were asked

regarding the Disaster Recovery System (technology) to which IT Director Thomas Fichtner responded. Mr. Davis answered questions regarding the status of a process for community assistance. He suggested one avenue could be to increase disbursements previously awarded to agencies already receiving allocations.

Council requested staff to think out of the box in relation to creating programs or opportunities for the youth and their desire to address gun violence. Additional items discussed were a Senior Center; funding for the turf fields for Celebration Park; a possible “broken window” grant to assist small business owners repair broken windows due to increased crime; and assistance to seniors with rent or utility costs increasing.

Interim City Administrator Brian Davis asked Council to come to a consensus and provide direction for staff. While there was some support for capital items which have an order or lead time, the Council determined to further review of the list before making decisions during a future regular meeting.

4. ADJOURNMENT

Management Team

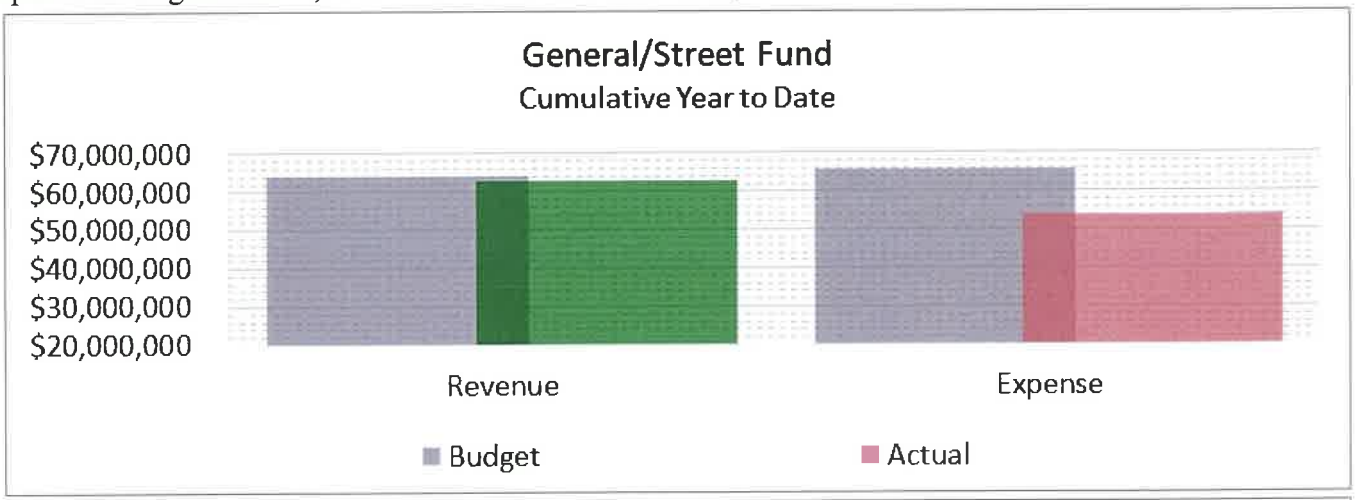

FROM: Steve Groom, Finance Director
Chase Donnelly, Deputy Finance Director

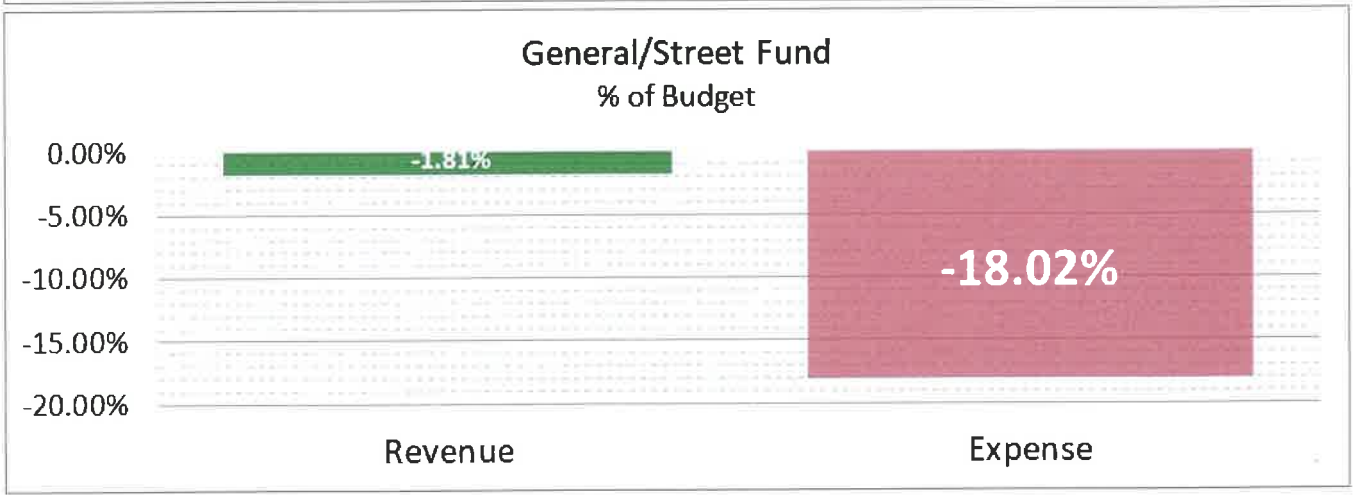

SUBJECT: December 2021 Monthly Financial Report

This report is to brief you on monthly and annual revenues and expenses, compared to budget and prior year, and on the city's cash and fund balance positions. December figures are preliminary, subject to audit.

General/Street Fund Summary:

Revenues & Transfer In, are unfavorable to budget of $64.0M by $1.2M or (1.8%). Actual revenues are essentially on-budget; this variance is primarily due to reduction of year-end interfund Transfers In of $1.1 million. Expenditures & Transfer Out, are favorable to budget of $65.8M by $11.9M (18.0%), primarily due to unspent ARPA grant funds, to be carried forward into 2022.

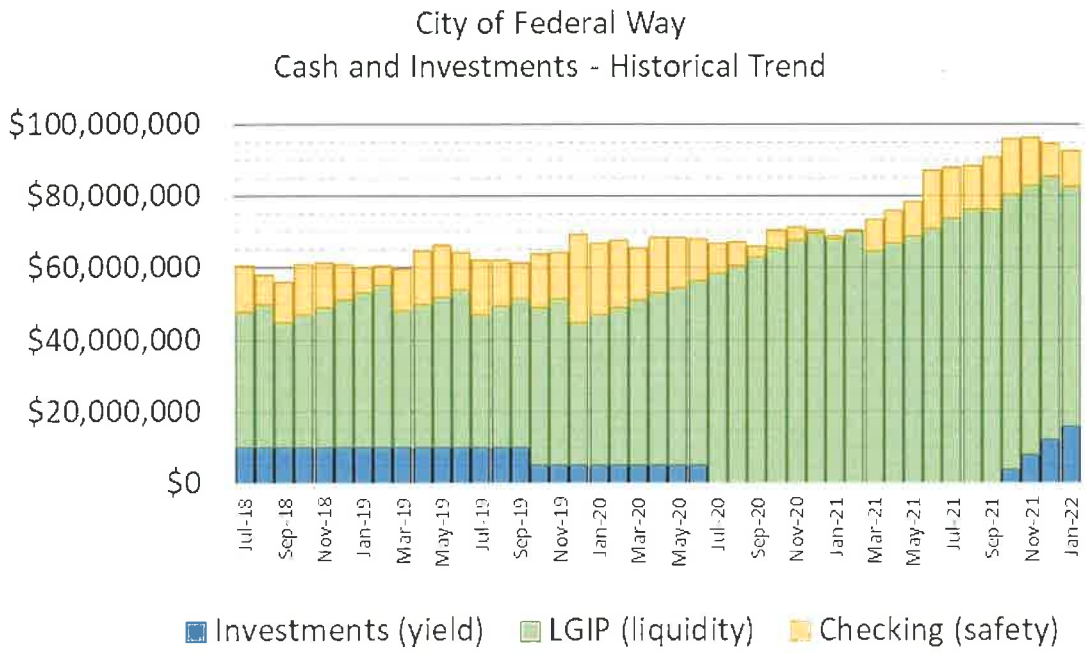

Cash and Investments:

The City's cash balance trend is shown below:

- Cash trend increased, primarily due to Property Tax receipts
- Investments increased from $12 million to $16 million

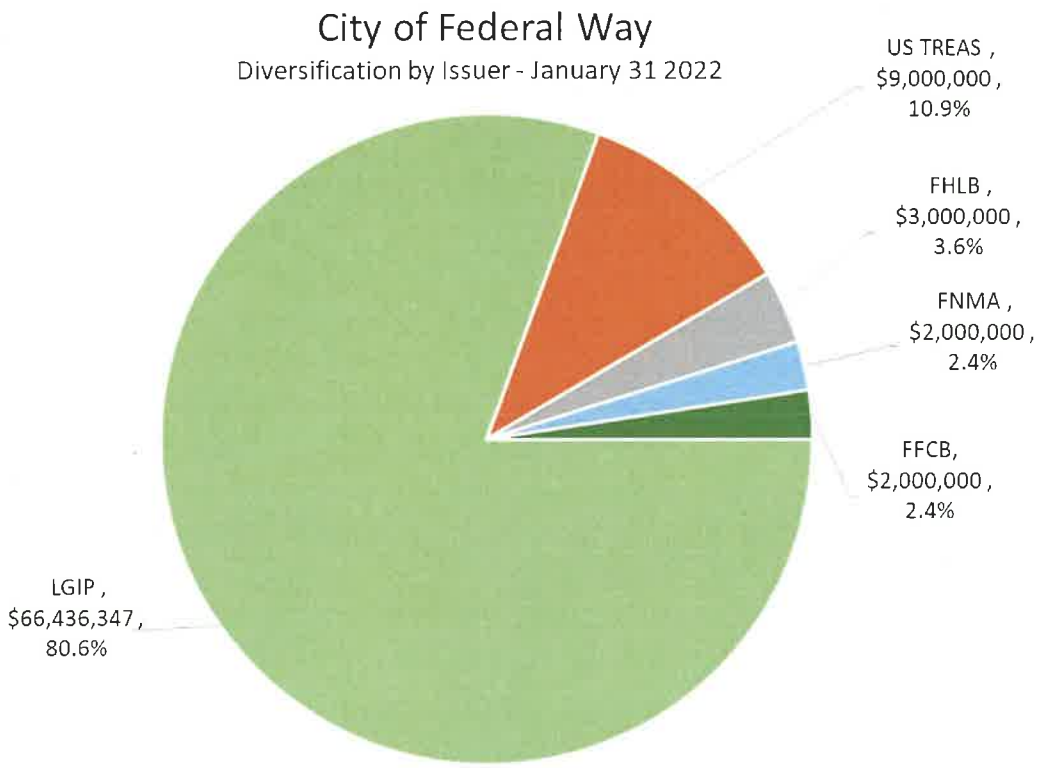

Issuer	Issuer	$	Actual %	Policy % Limit
LGIP		$ 66,436,347	80.6%	100.0%
US TREAS		$ 9,000,000	10.9%	100.0%

Purchases: During the month, the following investments were purchased (see addendum for rationales):

- 2021-005 US Treasury **$1,000,000** to mature 01/31/2025, to **yield 1.150%**
- 2021-006 US Treasury **$1,000,000** to mature 12/20/2023, to **yield 0.890%**
- 2021-007 US Treasury **$1,000,000** to mature 11/24/2023, to **yield 1.120%**
- 2021-008 US Treasury **$1,000,000** to mature 10/31/2023, to **yield 1.071%**

City investments are being increasingly diversified by issuer (partially mitigating credit risk)

City investments are being increasingly diversified by maturity date (partially mitigating reinvestment risk); each maturity will result in $1 million to be reinvested in staggered investment rate environments we've now locked in 16 of 36 maturity dates with fixed yields:

January investments

Revenues and Expenditures:

General & Street Fund Financial Highlights

As detailed in the table below:

- Sales Tax revenue is trending favorably, $0.34M or 2.0% above 2021 budget, and $1.37M or 8.5% above 2020 collections. Retail sales are $1.11M above 2020 year-to-date collections. This is a very strong indicator of the health of the local economy.

- CD Permits & Fees revenue is trending favorably, $0.1M or 3.7% above 2021 budget and $1.3M or 64.3% above 2020 collections. One large permit review fee this year is for Redondo Heights Senior Living Facility.

- Total Expenditures & Transfer Out is trending favorably, $11.85M or 18.0% below budget, and $1.52M or 2.7% below 2020 actuals. This is primarily due to the delay of hiring temporary staff for Parks activities due to the Covid-19 pandemic, filling of Police Department vacant positions, timing of ARPA grant expenditures to be carried forward into 2022, and timing of expenditures in departments.

GENERAL & STREET FUND SUMMARY	2020		2021		Annual Budget vs. Actual Favorable/(Unfavorable)	
	Annual Budget	Annual Actual	Annual Budget	Annual Actual	$	%

Total Ending Fund Balance	**$ 9,521,926**	**$ 12,575,811**	**$ 10,852,340**	**$ 21,542,512**	**n/a**	**n/a**

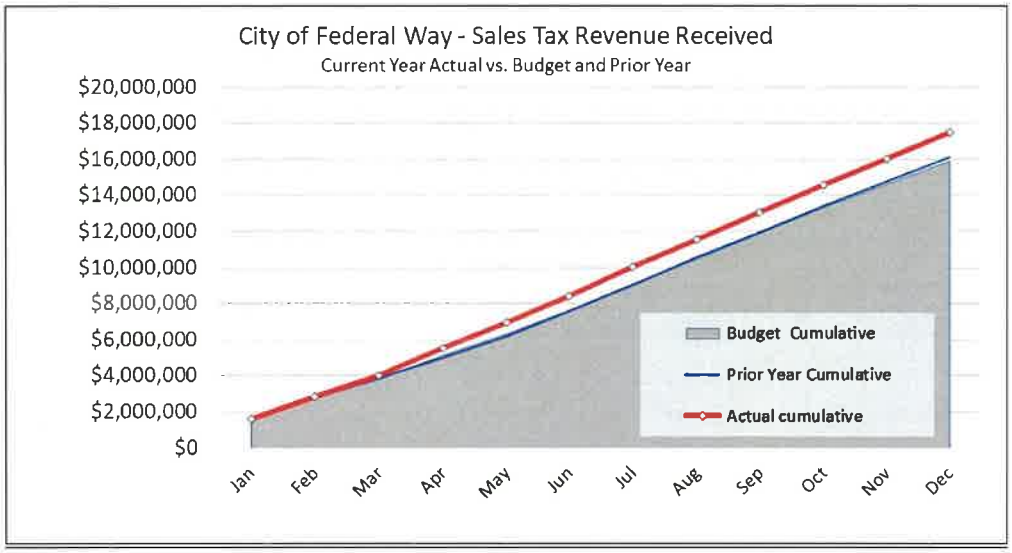

Other Fund Highlights

- Utility Tax revenue is trending favorably, $0.8M or 5.2% above 2021 budget, and $2.32M or 15.8% above 2020 actual. Extension of utility tax on water services and addition 10% on solid waste services account for the increase.
- Real Estate Excise Tax (REET) is $0.13M or 2.7% above 2021 budget, and $0.71M or 15.8% above 2020 collections. This is an indicator of the Federal Way real estate market's volume and valuations.
- Expenditures & Transfer Out is favorable, $4.22M or 13.4% below budget, but $2.53M or 10.2% above 2020 actuals. This is primarily due to timing of arterial street overlay projects for residential streets, lower jail service costs due to having lower average daily population in jails, and reduction in costs for city facilities due to closures from the COVID-19 pandemic.

Sales Tax

Revenues are above 2020 actual by $1.37M or 8.5%, and above 2021 budget by $0.34M or 2.0%. The sales tax collected for transactions at point of sale is remitted to state one month later, and remitted to city two months later, therefore monthly reporting shows a lag.

Hotel/Motel Lodging Tax

Revenues are favorable, above 2020 actual by $62K or 46.3%, and above 2021 budget by $46K or 30.5% and improving, as the graph below indicates. Although the travel, tourism, and hospitality industry has been greatly affected by COVID-19, tourism is starting to increase again.

Traffic Safety Fund pays for 1 Lieutenant, 8 Police Officers, 3 City Traffic positions, Municipal Court security services, red light photo services, Valleycomm emergency communication services, School Zone Enhancements capital improvement projects, and patrol vehicles.

Police Department Overtime

The total overtime budget of $1.39M consists of $1.08M for City overtime and $310K for billable time.

City's portion of overtime is $0.32M or 29.3% above projections, and $0.49M above 2020 actuals.

The month of December overtime increase of $60K above 2020 actual is primarily due to an increase in special events, and an increase in shift call-in overtime.

Addendum – Investment Rationales

Staff Review of Investment Rationale

Date: January 11, 2022

Investment # 2022-013 is a 3-year US Treasury (UST), face value $1,000,000, maturing January 31, 2025, 1.3750% coupon purchased at 100.6719 (premium) to yield 1.1500%. This trade settles December 12, 2022 with Time Value Investments, US Bank Safekeeping, reducing our position in the Washington State LGIP investment pool.

Liquidity: At Dec 31st, month-end, checking account balance was $9.3 million (target minimum is $6 Million), investment portfolio was $12.0 million (target is $36 million for Treasuries and Agencies). State LGIP investment pool balance was $73.3 million (target minimum is $30 million).

Safety: This purchase is a debt issue of the Federal government, equivalent to Aaa/AA+ rating by Moody's and S&P.

Yield. Yield is 1.15%. This investment is 107 basis points over LGIP. Comparable yields are:

LGIP current 30-day yield	0.081295%	www.secureaccess.wa.gov
2-year/3-year Treasury	0.92% / 1.21%	Treasury.gov
3-year Agency bullets	None for this maturity date	Broker inquiry

Callability. This investment is not callable (a bullet).

Diversification. This purchase brings this issuer to 9.3% of total portfolio.

This purchase adds a maturity date previously not covered to city's laddered portfolio.

Outlook. The yield curve is currently low and flat; the 1-year Treasury at 0.46%, the 2-year at 0.92% the 3-year at 1.21%, and the 5-year at 1.53%. The Federal Reserve Bank has been keeping rates low with continued uncertainty of a 2022 rate hike. By filling maturity gaps in a 3-year ladder, we minimize reinvestment risk subject to rates at any one point in time and hedge against further decreasing rate LGIP exposure.

Staff Review of Investment Rationale

Date: January 11, 2022

Investment # 2022-014 is a 2-year Federal Farm Credit Bank (FFCB), face value $1,000,000, maturing December 20, 2023, 0.6800% coupon purchased at 99.5970 (discount) to yield 0.8900%. This trade settles December 12, 2022 with Wedbush Securities, US Bank Safekeeping, reducing our position in the Washington State LGIP investment pool.

Liquidity: At Dec 31st, month-end, checking account balance was $9.3 million (target minimum is $6 Million), investment portfolio was $12.0 million (target is $36 million for Treasuries and Agencies). State LGIP investment pool balance was $73.3 million (target minimum is $30 million).

Safety: This purchase is a debt issue of a government-sponsored enterprise (GSE), that carries an explicit Federal guarantee, equivalent to Aaa/AA+ rating by Moody's and S&P.

Yield. Yield is 0.89%. This investment is 81 basis points over LGIP. Comparable yields are:

LGIP current 30-day yield	0.081295%	www.secureaccess.wa.gov
2-year/3-year Treasury	0.92% / 1.21%	Treasury.gov
2-year Agency bullets	0.890%	Broker inquiry

Callability. This investment is not callable (a bullet).

Diversification. This purchase brings this issuer to 1.1% of total portfolio.

This purchase adds a maturity date previously not covered to city's laddered portfolio.

Outlook. The yield curve is currently low and flat; the 1-year Treasury at 0.46%, the 2-year at 0.92% the 3-year at 1.21%, and the 5-year at 1.53%. The Federal Reserve Bank has been keeping rates low with continued uncertainty of a 2022 rate hike. By filling maturity gaps in a 3-year ladder, we minimize reinvestment risk subject to rates at any one point in time and hedge against further decreasing rate LGIP exposure.

COUNCIL MEETING DATE: March 1, 2022 **ITEM #:**

CITY OF FEDERAL WAY
CITY COUNCIL
AGENDA BILL

SUBJECT: REQUEST FOR PROPOSALS – CITY OF FEDERAL WAY BROADBAND PLANNING STUDY

POLICY QUESTION: Should City Council authorize staff to issue a Request for Proposals for a Broadband Planning Study?

COMMITTEE: FEDRAC **MEETING DATE:** February 22, 2022

CATEGORY:

☒ **Consent**	☐ **Ordinance**	☐ **Public Hearing**
☐ **City Council Business**	☐ **Resolution**	☐ **Other**

STAFF REPORT BY: Tim Johnson, Economic Development Director **DEPT:** Mayor's Office

Attachments: 1. Staff Report
2. RFP – City of Federal Way Broadband Planning Study

Options Considered:

1. Authorize staff to issue a Request for Proposal for the Broadband Planning Study.
2. Do not authorize and provide direction to staff.

MAYOR'S RECOMMENDATION: Option 1.

CITY OF FEDERAL WAY
MEMORANDUM

DATE: February 14, 2022

TO: City Council, (FEDRAC)

VIA: Jim Ferrell, Mayor

FROM: Thomas Fichtner, Director, Information Technology & Tim Johnson, Economic Development Director

SUBJECT: Approval of Request for Proposal, (RFP) - City of Federal Way Broadband Planning Study

---

Financial Impacts:
The Broadband Planning Study will be funded by a grant from the Washington State Community Economic Revitalization Board (CERB) in the amount of $50,000/General Fund. The grant will be matched with $25,000 from the City's American Rescue Plan Act/Local Fiscal Recovery Fund (ARPA/LFRF) as approved by City Council at the September 7, 2021, Regular Meeting. There will be no impact on the General Fund.

Policy Question:
Should City Council authorize staff to issue a Request for Proposals for a Broadband Planning Study?

Background Information:
The City Council at their December 7, 2021, regular meeting accepted a grant from the Washington State Community Economic Revitalization Board (CERB) in the amount of $50,000 with a $25,000 match from the City's American Rescue Plan Act/Local Fiscal Recovery Fund (ARPA/LFRF) for a city-wide Broadband Planning Study.

The proposed study will prepare the City for federal infrastructure grant(s) for the design, engineering, and construction of broadband infrastructure, and will be the first step in deploying accessible, high-speed broadband to residents and businesses throughout the city.

Specifically, the study will provide the following:

- An assessment of the current availability of broadband infrastructure and its adequacy to provide high-speed internet access and other advanced telecommunications services to end-users.

- The location of where retail communications services will be provided.

- Evidence relating to the unserved nature of the community in which retail telecommunications services will be provided and how to provide low to no-cost service to those with a demonstrated need by income/wage.

- Expected costs of providing retail telecommunications services to customers of the public entity.

- Evidence that proposed telecommunications infrastructure will be capable of scaling to greater download and upload speeds to meet state broadband goals.

- Sources of funding for the project will supplement any grant or loan awards.

- A strategic plan to maintain the long-term operation of the infrastructure and the expected installation charges and monthly costs for end users.

A subsequent report can examine the costs of design and engineering, which can be paid for either through ARPA, the federal infrastructure act, or through a combination of both, according to our federal lobbyists Van Ness and Feldman.

Timeline:

RFP Issue Date	March 4, 2022
Deadline for proposals	April 1, 2022
Proposal Review Period	April 4, 2022 – April 6, 2022
Consultant Interviews	April 7, 2022 – April 8, 2022
Consultant Recommendation Determined	April 11, 2022
Consultant Approval by Council	April 19, 2022
Project Commencement Date	May 2022
Project Completion Date	November 2022
Presentation of Study to Mayor and Council	December 6, 2022

Recommendation:

Authorize staff to issue a Request for Proposals for a Broadband Planning Study.

Attachments:

A. RFP

CITY OF FEDERAL WAY
REQUEST FOR PROPOSAL

I. PURPOSE OF REQUEST.

The City of Federal Way ("City") is requesting proposals for the purpose of a city-wide Broadband Planning Study. The City's needs are outlined in the following Request for Proposal ("RFP").

II. TIME SCHEDULE.

The City will follow the following timetable:

Issue RFP	March 4, 2022
Pre-Proposal Questions Deadline	March 16, 2022
Response to Questions Deadline	March 18, 2022
Deadline for Submittal of Proposals	3:00 p.m. PST on April 1, 2022
Proposal Review Period	April 4, 2022 – April 6, 2022
Consultant Interview Period	April 7, 2022 – April 8, 2022
Preliminary Selection of Firm	April 11, 2022
Notify Firm Chosen	April 20, 2022

III. INSTRUCTIONS TO PROPOSERS.

A. All proposals should be sent to:

Thomas Fichtner, Director, Information Technology
City of Federal Way
33325 8th Ave S
Federal Way, WA 98003-6325
(253) 835-2547
Thomas.Fichtner@CityofFederalWay.com

B. Proposals shall not exceed 25 pages

C. If submitted on paper, all proposals must be in a sealed envelope and clearly labeled in the lower left-hand corner. If submitted by email, all proposals must be clearly labeled in the subject line. The label shall identify the contents as "RFP Broadband Planning Study."

D. All proposals must be received by the Deadline for Submittal of Proposals detailed in II. Time Schedule, at which time they will be opened. Three (3) copies of the proposal must be presented. Faxed or telephone proposals will not be accepted.

E. Proposals should be prepared simply and economically, providing a straight forward,

concise description of provider capabilities to satisfy the requirements of the request. Special bindings, colored displays, promotional materials, etc. are not desired. Emphasis should be on completeness and clarity of content. Use of recycled paper for requests and any printed or photocopied material created pursuant to a contract with the City is desirable whenever practicable. Use of both sides of paper sheets for any submittals to the City is desirable whenever practicable.

F. The Director of Information Technology or representative will notify the firm selected by the date stated in II. Time Schedule.

G. All proposals must include the following information:

- Cover letter including basic information on the firm, such as company name, business address, website, phone number, and project manager contact information.
- Brief history and background information on the firm.
- Demonstration(s) of experience in municipal broadband planning including example(s) of previous broadband project(s) with references from corresponding public entities.
- A proposed outline of tasks, products, milestones and project schedule, including the number of hours required to complete each task or product.
- A proposed budget based on the above outline of tasks, products and schedules.
- Methods and tools of research, evaluations, and analysis.
- The names of individuals from those firms who will be working on the project and their areas of responsibility.
- Specific experience of individuals relative to the proposed project.
- Resumes of project manager and any additional team members and/or sub-contractors to be used on project.
- References.
- Any additional material that may differentiate your firm from competition

IV. SELECTION PROCESS

The City will evaluate and rank all qualifying proposals received by the closing date based on the following qualification and selection criteria. Additionally, interviews/oral presentations may be conducted with the top scorer.

V. QUALIFICATION CRITERIA

Respondents to this RFP will be required to submit their qualifications, experience, and technical competence to perform the services as outlined in this document.

The following will be considered minimal contents of the proposal:

1. Consultant must have experience conducting community broadband feasibility plans of similar size and scope to the project area and population. Consultant must demonstrate its capabilities providing these services to municipalities of similar size to Federal Way. The consultant should also describe its ability to work with elected officials, businesses, and residents.

2. All firms must have been in business providing community broadband planning services for a minimum of five years. Consultant and project team must have conducted broadband planning projects for at least three other municipalities.

3. Consultant must have direct experience working with public/private entities with focus on broadband and municipal broadband network planning.

4. Consultant firm and project team must have direct and demonstrable regulatory experience working with Washington State communities in regard to State statutes concerning municipal broadband providers or satisfactorily demonstrate alternative results.

5. Consultant must have extensive business and financial planning experience with municipal broadband networks.

6. Consultant must be able to demonstrate ability to complete quality work in a timely manner. Time is of the essence, and an emphasis will be given to those who can complete all aspects of the scope of work in its entirety at or before the deadline.

VI. EVALUATION CRITERIA.

The City will rank consultants on six categories totaling 100 points.

Cost Proposal (30 points)

- Competitiveness of consultant's proposed cost.
- Demonstration of commitment to meet City's project budget.

Firm Experience (20 points)

- General firm information and experience with telecommunications/broadband entities and municipal broadband planning.
- Quality of references.
- Similarity and quality of past, similar projects.
- Demonstration of knowledge of economic development principles and trends and their applications to municipal broadband.

Project Team Qualifications (15 points)

- Experience and qualifications of project manager and any additional consultants to be used on project.
- Staff with experience in municipal broadband feasibility planning are considered desirable.

Approach to Fulfilling Scope of Work (15 points)

- Quality and completeness of methodology for fulfilling every element of scope of work.

Community and Stakeholder Engagement Approach (10 points)

- Quality and completeness of community engagement and stakeholder outreach plan.

Timeline (10 points)

- Ability of consultant to complete the project in proposed timeline.
- Demonstration of commitment to meet City's project timeline.

Each proposal will be independently evaluated on factors one through three.

VII. TERMS AND CONDITIONS.

A. The City reserves the right to reject any and all proposals, and to waive minor irregularities in any proposal.

B. The City reserves the right to request clarification of information submitted, and to request additional information from any proposer.

C. The City reserves the right to award any contract to the next most qualified contractor, if the successful contractor does not execute a contract within thirty (30) days after the award of the proposal.

D. Any proposal may be withdrawn up until the date and time set above for opening of the proposals. Any proposal not so timely withdrawn shall constitute an irrevocable offer, for a period of ninety (90) days to sell to the City, the services described in the attached specifications, or until one or more of the proposals have been approved by the City administration, whichever occurs first.

E. The contract resulting from acceptance of a proposal by the City shall be in a form supplied or approved by the City, and shall reflect the specifications in this RFP. A copy of the contract is available for review and shall include requirements to comply with ADA, Civil Rights Act, and EEO requirements. The City reserves the right to reject any proposed agreement or contract that does not conform to the specifications contained in this RFP, and which is not approved by the City Attorney's office.

F. The City, as a recipient of federal funding, in accordance with Title VI of the Civil Rights Act of 1964, 78 Stat. 252, 42 U.S.C. 2000d to 2000d-4 and Title 49, Code of Federal Regulations, Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Nondiscrimination in Federally-Assisted Programs of the Department of Transportation issued pursuant to such Act, hereby notifies all bidders that it will affirmatively ensure that in any contract entered into pursuant to this advertisement, disadvantaged business enterprises as defined at 49 CFR Part 26 will be afforded full opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, national origin, or sex in consideration for an award.

G. The City shall not be responsible for any costs incurred by the firm in preparing, submitting or presenting its response to the RFP.

H. Upon completion of the Broadband Study, all data, maps, and reports shall be the property of the City of Federal Way.

VIII. SCOPE OF SERVICES.

Introduction

The City of Federal Way is seeking written proposals from qualified professionals who are knowledgeable in research and development, planning, and data analysis for a city-wide Broadband Planning Study. The successful consultant will work closely with elected officials, stakeholders and city staff to identify existing assets and opportunities of service.

Proposals are solicited in accordance with the terms, conditions, and instructions as set forth in this Request for Proposal ("RFP").

Background

The City of Federal Way (99,590 population [Washington OFW]), located in the Seattle/Tacoma metro area along Interstate 5, aims to bring high-speed internet to the entire city as an essential component of its economic and community development goals.

In February of 2020, the Mayor and City Council identified the goal of becoming a technology hub to diversify the city's economy. Research conducted by city staff identified that fast and reliable Internet service through broadband infrastructure is transformative function in accomplishing this goal. Through the deployment of high-speed, reliable, and cost-competitive broadband, the City aims to attract, retain, and grow businesses, while

providing accessible, high-speed internet to all Federal Way businesses and residents to enhance the "digital provide".

Through the broadband planning study and the subsequent deployment of broadband, the City of Federal Way aims to accomplish the following goals:

- Access/Inclusivity – Provide the opportunity for high speed broadband service to all residents, businesses, schools, local government, non-profit organizations, healthcare service providers, and multi-tenant properties within the City.

- High Speed – Requires at least 1 Gbps symmetrical broadband connection for residential and up to 10 Gbps symmetrical broadband connection for business or government organizations with the ability to grow the network.

- Reliable – The service must be dependable as it will have many uses requiring high availability by businesses and residents. A focus on redundancy should be a key element in the study to ensure reliability.

- Reasonable Cost – The monthly charges for such service should be reasonable and affordable. Concurrently, it should also provide for the ability to meet debt service obligations should construction of a network be a feasible option.

Scope of Work & Deliverables

The Contractor will provide strategic guidance for the implementation of a broadband project that can be implemented cost-effectively and quickly for the purposes of enabling economic development and citizen connectivity in Federal Way. As a part of this, the Contractor will work closely with identified stakeholders to develop a final Broadband Planning Study Report.

In doing so, the Contractor will perform the following:

A. Stakeholder Engagement

To engage with project stakeholders, the Contractor will:

1. Attend and participate in regular meetings throughout the duration of the project with the Broadband Advisory Taskforce ("BAT") and any additional stakeholders identified by city staff to refine strategic planning objectives, develop a community vision statement, and identify project priority areas (i.e. closing the "homework gap", providing affordable connection to residents and businesses, etc.)
    a. Broadband Advisory Taskforce member names and titles must be listed in the final written report.

b. Internet Service Providers currently serving the city must be invited via email to at least one meeting.

2. Ask and record the public responses to the following questions:
   a. Which providers are currently serving the community?
   b. Which providers attended the meeting?
   c. How does the mapping results compare with the BAT members' and community members' actual experiences? (If mapping is available)
   d. Does existing broadband access meet community needs?
   e. If access is inadequate, in what ways does it fall short?
   f. If broadband is available, how do you use it now?

3. Identify any on-going community projects focusing on the digital divide or information technology (i.e. public access through schools/libraries, training, etc.)

B. Review Existing Services and Assets

In reviewing existing broadband services and assets within Federal Way, the Contractor will:

1. Conduct a local broadband market assessment that identifies existing broadband options and costs within the City. The market assessment will include the following:
   a. Assessment of the telecommunications environment in Federal Way detailing types and level of service, pricing, availability and limitations
   b. Identification and analysis of existing resources of all stakeholder entities
   c. Assessment of current broadband infrastructure assets within the city, with a complete inventory of existing facilities and broadband assets in the city (i.e. towers, wireless facilities, fiber, conduit, etc.) Strand capacity, availability, characteristics, and geographical location of fiber must be described and assessed.

2. Conduct a gap analysis defining the additional broadband infrastructure necessary to meet the identified community broadband goals.

3. Identify unserved, underserved, and served (as defined by the Community Economic Revitalization Board) areas of Federal Way and provide evidence of how this was determined. In doing so, the Contractor will map the current levels of service in Federal Way, and perform technical and financial evaluations of Federal Way's existing broadband network to evaluate current private network capabilities.

4. Identify if the municipality uses broadband to deliver municipal services. If so, describe the services and how broadband is used to deliver these services.

5. Reviewing existing Internet Service Providers' services and pricing in Federal Way.

C. Evaluate Current and Future Demand

To evaluate current and future demand of broadband services in Federal Way, the Contractor will:

1. Evaluate current and future demand for residents, businesses, and other major entities in Federal Way while considering input provided by the Broadband Advisory Taskforce and any additional stakeholders identified by city staff.

2. Determine last-mile, middle-mile, and backbone needs based on the City's desired level of service.

3. Assess the difference between the current and future demand of broadband services in Federal Way.

4. Formulate and deploy Business and Resident Broadband Surveys. Surveys will include the following information:
    a. Address or area of City of Federal Way
    b. Type of residence or business
    c. Current provider, advertised speed, and price of service
    d. Speed test
    e. Type(s) of broadband used (wired and/or wireless)
    f. Levels of satisfaction with current internet service:
        i. Speed
        ii. Price
        iii. Reliability
        iv. Customer Service
    g. Factors of importance when choosing internet service:
        i. Download speed
        ii. Upload speed
        iii. Price
        iv. Reliability
        v. Customer service

5. Determine penetration and adoption rates, foreseeable competition, and sensible pricing for potential services.

D. Identify Implementation Opportunities

The Contractor will identify broadband implementation opportunities and create a Broadband Implementation Strategy. In doing so, the Contractor will:

1. Assess network costs, risks, revenue, and ROI.

2. Review all relevant broadband technology and telecommunication industry trends, and complete a network design accompanied with cost estimates.

3. Analyze multiple operating models and provide recommendations.
    a. Examine, assess and compare Public, Private, and P3 operating models.
    b. Examine, assess, and compare whether the City should own/manage conduit, dark fiber, or lit fiber.

4. Analyze multiple business models and provide recommendations.
    a. Examine, assess, and compare various business models for delivering broadband services in Federal Way.
    b. Examine, assess, and compare Public, Private, and P3 business models.
        i. Analyze the costs including key partners utilized, key activities engaged in, and key resources for each option. ii. Analyze revenue models including customers and market segments served for each option. iii. Synthesize cost and revenue options to generate value propositions for each option.
    c. Examine, assess, and compare exclusive (closed network) vs. non-exclusive (open network) ISP access.
    d. Examine, assess, and compare whether the City should own/manage conduit, dark fiber, or lit fiber.

5. Provide preferred alternative implementation strategies based on best practice for implementation.

6. Identify and justify potential funding sources.
    a. If debt, identify and justify revenue structures to repay.

7. Assess Federal, State, and municipal procedures, policies, rules, statutes and ordinances that impact or influence broadband infrastructure deployment.

E. Community Impact and Evaluation

To evaluate the community impact of the broadband project, the Contractor will:

1. Evaluate how the project would benefit the health and safety of the community.

2. Evaluate how this project would benefit education and access for all age groups in the community.

3. Evaluate if the community is unserved or underserved (as defined by the Community Economic Revitalization Board) and provide evidence of how this was determined.

4. Identify classes or types of businesses that could benefit from lower cost, higher bandwidth and or improved reliability of broadband.
    a. Include the level of broadband improvements need by business to become or remain competitive and or expand markets.
    b. Incorporate input from property owners, business owners and operators, and residents in Federal Way.

5. Identify any local or regional economic development plans in which broadband could play a role and provide a list of documents.

6. Provide recommendations of how the City can:
    a. Address providing affordable internet options.
    b. Expand the availability of affordable equipment to low-income residents.
    c. Teach people to use technology.
    d. Increase public computer access locations.

F. Deliverables

The Contractor will provide the following deliverables:

1. Written or verbal progress updates to city staff on a weekly basis, highlighting project progress.
    a. Updates will be accompanied by a calendar timeline identifying key tasks, dates, and responsible parties. The consultant is to update the calendar on a regular basis.

2. Periodic written or verbal updates to the Mayor, City Council, and Broadband Advisory Taskforce.

3. Written Quarterly Project Reports until the completion of the project beginning on the contract execution date. Any problems, delays, or adverse conditions which will materially affect the ability to meet project objectives, time schedules, or work units by the established time period must be disclosed. Disclosure must be accompanied by a statement of action taken or contemplated and any assistance from the City needed to resolve the situation. Quarterly Project Report due dates will be specified in the final contract.

4. A draft written broadband Planning Study that describes all the research in the Statement of Work, survey results, data analyzed, as well as strategies to guide

economic development in Federal Way. The draft will be submitted to city staff for review and comment. More specifically, the report will:

a. Define local broadband needs and goals.

b. Inventory existing broadband infrastructure assets in Federal Way.

c. Include a gap analysis defining the additional broadband infrastructure necessary to meet identified goals.

d. Include one or more potential network designs, cost estimates, operating models and business models.

e. Include an assessment of municipal procedures, policies, rules and ordinances that impact of influence broadband infrastructure deployment.

f. Include a list of:

1. Potential community anchor organizations.
2. Businesses that could benefit from lower cost, higher bandwidth, and/or remain competitive and/or expand markets, accompanied by the level of broadband improvements needed by the businesses to become and/or remain competitive and/or expand markets

g. Provide a Management Plan that defines or refines the Broadband Plan with a clear definition of roles and responsibilities, partners required, levels of effort and associated costs, and a timeline. Plans and actions must include promotion and community awareness and extend beyond the initial deployment of broadband.

h. Provide Budget for the plan aligned to significant project plan milestones, costs, and tasks, accompanied by a pro forma income statement, balance sheet, and cash flow. Potential sources of funding for the broadband infrastructure must be identified in the budget, accompanied by letters of commitment for community funding and letters of commitment from Internet Service Providers.

i. A completed Readiness Self-assessment.

5. Upon city staff review and comment of the draft Planning Study, Contractor will present the draft Study to the Mayor and City Council.

a. The final version of the Broadband Planning Study will be submitted after review of the draft study by city staff, the Mayor, and City Council.

6. A final written Broadband Planning Study. The final draft should be transmitted to the Mayor and City Council, followed by a final presentation.

7. Consultant signature on the Certified Completion report provided by city staff.

IX. COMPENSATION.

A. The allocated budget for this project is $60,000.

B. Payment by the City for the services will only be made after the services have been

performed, an itemized billing statement is submitted in the form specified by the City and approved by the appropriate City representative, which shall specifically set forth the services performed, the name of the person performing such services, and the hourly labor charge rate for such person. Payment shall be made on a monthly basis, thirty (30) days after receipt of such billing statement.

X. NEGOTIATION PROCESS

The Selected Consultant will be invited to enter into a collaborative predevelopment process based upon the Selected Consultant's Proposal. The Selected Consultant will negotiate with the City to reach mutually agreeable terms for the scope of work and timeline for the broadband feasibility study. It is anticipated that a successful negotiation will result in:

- A contract award to the selected Consultant
- Other documents necessary to affect this transaction

If negotiations with the Selected Consultant are not successful, negotiations will be terminated and new negotiations will begin with the next ranked Selected Consultant or the City may determine in its sole subjective discretion to terminate the process entirely.

PROPOSED COUNCIL MOTION: *"I move approval of the proposed acceptance of the lowest responsive bid from CEM Aquatics and authorize the allocation of $484,791.60 of ARPA funds to pay for the new water slide and play features at the Federal Way Community Center and authorize the Mayor to execute the contract."*

CITY OF FEDERAL WAY
MEMORANDUM

DATE: February 14, 2022

TO: City Council Members

VIA: Jim Ferrell, Mayor
Brian Davis, Interim City Administrator

FROM: John Hutton, Parks Director JH

SUBJECT: RFB 21-012 Federal Way Community Center - Slide Replacement

---

Financial Impacts:

This item is a one-time capital project and was not included within the Biennial approved budget for the Federal Way Community Center Slide Replacement. Staff received approval in November 2021 to utilize $500,000 of ARPA Funds towards this project. In addition, City Council approved staff to apply for a $250,000 grant through the King County Parks Aquatic Facilities Grant. After soliciting bids, total pricing for the slide replacement has exceeded the original staff proposed budget. The lowest responsive and only bidder submitted a total price of $1,189,705.37. Upon completion of the Federal Way Community Center Slide Replacement, there are no anticipated future costs.

Background Information:

In the fall of 2017, staff noticed significant cracking in the concrete staircase leading to the waterslide within the FWCC recreation pool. The slide was shut down until we could properly assess the current condition, make attempts to remedy the cracking, and determine it safe for use.

Staff worked with Bright Engineering, Inc. and came up with a plan for temporary repairs and ultimately the ability to reopen the slide amenity. Bright Engineering, Inc.'s report revealed to the City that the rebar structure inside the stair column was damaged and, due to this, the concrete slide structure was failing from the inside out. The rebar structure was damaged by the chemical reaction the pool chlorine had on untreated carbon steel rebar. It's important to note that "coated" steel rebar was originally specified when the slide was being built, but apparently was not installed per the construction drawings. Absher Construction Co., who built the FWCC, and the City had reached a settlement years ago on other construction issues, thus leaving the City no recourse with Absher Construction Co. to address this new problem.

Bright Engineering, Inc. prepared a repair plan and specified products to make the needed

initial repairs to keep it structurally sound and useable for patrons until a longer-term solution could be achieved. Our talented in-house maintenance staff were able to make the initial, temporary repairs, completed in January 2018. Originally, Bright Engineering, Inc. estimated the repairs would last about one year. Our staff completed almost perfect work; so well done that the repairs actually held up for three years.

Staff noticed the cracking reappearing in February 2021. We called Bright Engineering, Inc. back in to have the stairs reassessed. They were impressed with how long the initial repairs held up and staff was hopeful we could patch a second time. Unfortunately, further repairs were not possible and the Engineer expressed concern about the structural integrity for continued use due to three more years of chlorine potentially eating away at the internal rebar. The Engineer did not have concerns of imminent structural failure, but could no longer endorse its continued use.

Based on the consultation from the Engineer, FWCC staff permanently shut down the slide in February 2021. In the meantime, staff worked to devise a project timeline to remove the existing structure and install a new one.

After analyzing the project needs, staff decided it is in the best interest of the City to break this project up into two phases. Phase one, which includes the demolition of the existing slide and structure to the pool deck was completed in December 2021. With council approval, staff put RFB 21-012 for the Slide Replacement out to bid on December 10, 2021, with a closing date of January 7, 2022. No bids were submitted at the closing of the initial bid, leading staff to re-open the bid for an additional two weeks. The second round of RFB 21-012 closed on February 18, 2022, with only one bid submitted.

At this time, due to the bid received being significantly over the original staff proposed budget, staff is bringing the FWCC Slide Replacement project back to City Council to discuss the following options and receive further direction.

Option 1: Authorize staff to request additional $484,791.60 in ARPA funds to complete the FWCC Slide Replacement Project

Option 2: Authorize staff to request $484,791.60 from General Fund to complete the FWCC Slide Replacement Project

Option 3: Do not replace slide or play structure at this time.

PROJECT INCLUSIONS

General

- Protection of existing pool deck
- Dust protection
- Dumpster for work to be preformed
- Removal/Installation of glass doors/windows
- Cleaning of natatorium after completion

Demolition

- Removal of existing deck
- Removal of existing play structure
- Removal of existing water slide footings
- Plaster removal (alternate)

Excavation

- Excavation required for new slide footings
- Backfill material to be flowable fill slurry

Concrete

- Forming of water slide footings
- CIPC waterslide footings/columns
- CIPC pool deck
- Strip and remove form material
- Structural reinforcement of slide footings
- Structural reinforcement of pool deck

Electrical

- Grounding/Bonding of slide footings
- Grounding/Bonding of play structure
- Wiring to be ran through existing conduit
- Grounding/Bonding of new pool deck
- Supply/Install new slide emergency stop

Plumbing

- Connect water supply to waterslide
- Connect water supply to play structure

Water Features

- Waterslide complex
- Elevations L2 play structure

Pool Finish

- Exposed aggregate plaster (alternate)

PROJECT EXCLUSIONS

Demolition

- Any work associated with asbestos
- Any work associated with lead paint

Mechanical/Plumbing

- No work accounted for in mech room
- Existing pool equipment to be re-used
- Connection to natural gas and domestic water

Please feel free to contact me if you have any questions regarding this proposal or our scope of work assumptions.

					TOTAL – SCHEDULE A	$1,189,705.37

The documents incorporated by reference, as if fully set forth, are the Advertisement for Bids, the Instructions to Bidders and Checklists, the Contractor's Bid Proposal (including all forms and supplemental information listed on the Bidders Checklist), the Contract Documents (including Project Plans, Specifications, and all Appendices, Amendments, and Supplemental Reports & Information), the Contract Provisions (including all forms and supplemental information listed on the Contract Checklist), the version of the Washington State Standard Specifications for Road, Bridge, and Municipal Construction identified herein, and any other documents provided to bidders and/or referenced in or referred to by the Contract Documents.

Pursuant to and in compliance with the Advertisement for Bids for the Project, and other documents relating thereto, the undersigned has carefully examined all of the bid and contract documents, considered conditions which may affect the delivery, supply and maintenance for the Project, and hereby proposes to furnish all labor, materials and perform all work as required in strict accordance with the contract documents, for the referenced bid amount, inclusive of Washington State sales tax and all other government taxes, assessments and charges as required by law.

NON-COLLUSION AFFIDAVIT
By signing this proposal, the undersigned acknowledges that the person(s), firm, association, or corporation has (have) not, either directly or indirectly, entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding in connection with this project.

To report rigging activities, call 1-800-424-9071. The U.S. Department of Transportation (USDOT) operates the toll-free hotline Monday through Friday, 8:00 a.m. to 5:00 p.m., Eastern Time. Anyone with knowledge of possible bid rigging, bidder collusion, or other fraudulent activities should use the hotline to report such

Provided to Builders Exchange of WA, Inc. For usage Conditions Agreement see www.bxwa.com - Always Verify Scal

activities. The hotline is part of USDOT's continuing effort to identify and investigate highway construction contract fraud and abuse and is operated under the direction of the USDOT Inspector General. All information will be treated confidentially and caller anonymity will be respected.

CONFLICTS OF INTEREST, GRATUITIES, & NON-COMPETITIVE PRACTICES

By signing this proposal, the undersigned agrees as follows:

(1) That it has no direct or indirect pecuniary or proprietary interest, that it shall not acquire any interest which conflicts in any manner or degree with the work, services, equipment or materials required to be performed and/or provided under this contract and that it shall not employ any person or agent having any such interests. In the event that the Contractor or its agents, employees or representatives hereafter acquires such a conflict of interest, it shall immediately disclose such interest to the City and take action immediately to eliminate the conflict or to withdraw from this contract, as the City may require; and

(2) That no person or selling agency except bona fide employees or designated agents or representatives of the Contractor have been employed or retained to solicit or secure this contract with an agreement or understanding that a commission, percentage, brokerage, or contingent fee would be paid; and

(3) That no gratuities in the form of entertainment, gifts or otherwise, were offered or given by the Contractor or any of its agents, employees or representatives, to any official, member or employee of the City or other governmental agency with a view toward securing this contract or securing favorable treatment with respect to the awarding or amending, or the making of any determination with respect to the performance of this contract.

AFFIDAVIT OF ELIGIBILITY

The Contractor certifies that it is properly licensed and registered under the laws of the State of Washington and has not been determined to have been in violation of RCW 50.12.070(1)(b), RCW 51.16.070(1)(b), or RCW 82.32.070(2) within the last two years. The Contractor further certifies that it has not been determined, within the last one year, to have committed any combination of two of the following violations or infractions within a five year period: (1) Violated RCW 51.48.020(1) or 51.48.103; or (2) Committed an infraction or violation under Chapter 18.27 RCW.

CERTIFICATION OF LAWFUL EMPLOYMENT

The Contractor hereby certifies that it has complied with all provisions of the Immigration and Nationality Act now or as herein after amended, 8 U.S.C. 1101 et. Seq., and that all employees, including subcontractor employees, are lawfully permitted to perform work in the United States as provided in this agreement with the City of Federal Way.

Receipt of the following Addendums is hereby acknowledged:

Addendum No. ___ Date Issued: N/A

Addendum No. ___ Date Issued: _____

Addendum No. ___ Date Issued: _____

The undersigned individual represents and warrants that he or she is dully authorized to execute the bid and all bid documents on behalf of any partnership, joint venture or corporation.

WATER PLAY STRUCTURE DRAWS CROWDS AT DEL MAR FAMILY AQUATICS CENTER

The Del Mar Family Aquatics Center in Aurora, Colorado is radically different from its predecessor, a 60-year old, maintenance-heavy pool that experienced a sharp decline in attendance and revenue. Pool also staff struggled to keep up with its antiquated mechanical systems and constant operating issues.

Having re-opened its gates in 2015 after two years of renovations, the Aquatics Center's new 25-meter pool, diving well, splash park, family-friendly bathhouses, full-service concession stand, relaxation areas and walking path have made quite the impression on visitors. The Center has reported that it has more than doubled original revenue projections in the first year and it is drawing capacity crowds on a near-daily basis.

Looking to build something with a more recreational focus, the new Aquatics Center needed to appeal to the city's young families and encourage them to spend the entire day at the facility. All the new amenities also had to be safe and appropriate for users of all ages, as well as be water-efficient.

VORTEX

www.vortex-intl.com

World leader in aquatic play solutions with over 6,000 installations worldwide

Vortex International was tasked with providing a large, visually impressive Elevations™ structure for the Center's new splash park water playground. The multi-deck structure is one of Vortex's tallest to date at 40ft, and is capped off by a massive colorful dumping bucket visible throughout the park. The Elevations™ structure also includes three slides for children of all ages, including smaller kiddie slides, an open air slide, and an enclosed flume slide, as well as various spraying water features in a variety of eye-catching colors.

"From our perspective, the success at Del Mar was incredible. Our original revenue projections were for $100,000 and we more than doubled that amount last year, the first full year we were open. The kids loved the water playground and with the modifications we have planned for this year, allowing for younger kids to access more of the structure, we anticipate even more happy customers."

PROPOSAL

Federal Way Community Center

City of Federal Way, WA

January 17, 2022

January 17, 2022

City of Federal Way
City Hall Finance Department
33325 8th Avenue South
Federal Way, WA 98003

Attn: Mr. Leif Ellsworth, Community Center Manager

Dear Mr. Ellsworth:

Thank you very much for the opportunity to present our aquatic play solution for your consideration in replacing your current waterslide and aquatic play structure at the Federal Way Community Center. Vortex Aquatic Structures International has followed the same mission since it began 25 years ago—to lead the aquatic play industry by continuing to develop the most fun, innovative and safe products for families and children of all ages and abilities.

Let's review some of the key elements and objectives for your proposal:

- *Replace waterslide and play structure using existing plumbing and mechanical equipment*
- *Design a custom waterslide and play structure to fit the space, pool and slope*
- *Provide top quality commercial grade materials for maximum durability and low maintenance*
- *Provide an extended warranty*
- *Play structure shall have appropriate interactive features that appeal to children of various ages and abilities while respecting the area and necessary splash containment*
- *Include installation. Demo done separately.*
- *Bring new excitement and "WOW factor" to the pool.*

Vortex thoughtfully designs every project with a focus on meeting your requirements and maximizing the play experience for your users. This careful planning includes considering a variety of age groups, abilities, and developmental stages; capacity planning; play experience evaluation; sustainability; maintenance; life guarding and much more.

YOUR PRECISION RIDE WATERSLIDE

Vortex offers our state-of-the-art Precision Ride waterslide technology for the smoothest ride experience in the industry. Our manufacturing process, called Lite Resin Transfer Mold (LRTM), provides a sleek and

shiny finish on both the inside and the outside of the flume. In addition to the beautiful glossy look, it is also easier to clean and maintain and has a superior gel coat that lasts longer.

Additionally, The LRTM closed mold technology produces more precise parts, ensuring an easier installation and more accurate assembly. The better fit means tighter seams, and that equals a smoother ride. Besides improved slide quality, Vortex invested heavily into this technology and adopted this eco-friendlier manufacturing process to support our mission for greater sustainability.

Our waterslide pricing includes the tower, stairs, and flume. Detailed structural drawings, including the specifications for the necessary concrete footings, will need to be stamped by an engineer licensed in the State of Washington. Upon installation, slide commissioning and owner's training will be provided by a Vortex Technician.

All of the steel will be galvanized and powder coated in the color of your choice. You also have several color choices for your fiberglass flume.

YOUR CUSTOM ELEVATION PLAY STRUCTURE

Vortex uses a variety of water features, water effects and unique Vortex Play Technologies to enhance interactivity and maximize the fun on your custom Elevation Play Structure. The positioning in your pool and all posts are compatible with the existing water inlets and the slope of the floor. Highlights include:

- Side-by-side kiddie racer slides double the fun
- Cascade water basins and ponds provide a gathering place with hands-on activities
- Spinning flower and orbs give a dynamic visual impact
- Several interactive deck features are all around the platforms

Our designers selected a colorful yet sophisticated color palette that matches well with your existing pool amenities. However, you will have the opportunity to select any color combination of your choice, and there are a variety of panel design options for the deck barriers.

INSTALLATION

Vortex is pleased to partner with CEM Aquatics for the professional installation and erection of the Vortex waterslide and play structure. We have complete confidence in their experience and quality of work, and Vortex will support CEM with all technical and construction drawings and an on-site visit by a Vortex Field Technician to conduct a post installation inspection and commissioning.

It is assumed all mechanical equipment and water supply piping is in good condition and can provide the required water needed for proper functioning of the play structure and slide. If any repairs or replacements are needed, then those costs are not included in this equipment pricing.

Let's Play!

It will be my pleasure to work with you and the City of Federal Way to bring this exciting project to completion and let you experience the rewards of all of your hard work, planning and support of this community amenity.

Please don't hesitate to call me with any questions, and feel free to visit our website to learn more about Vortex Aquatic Structures International, www.vortex-intl.com.

Thank you for your time and consideration.

Please enjoy the proposal!

Best regards,

Michelle

A CLEAR SOURCE OF POSSIBILITIES

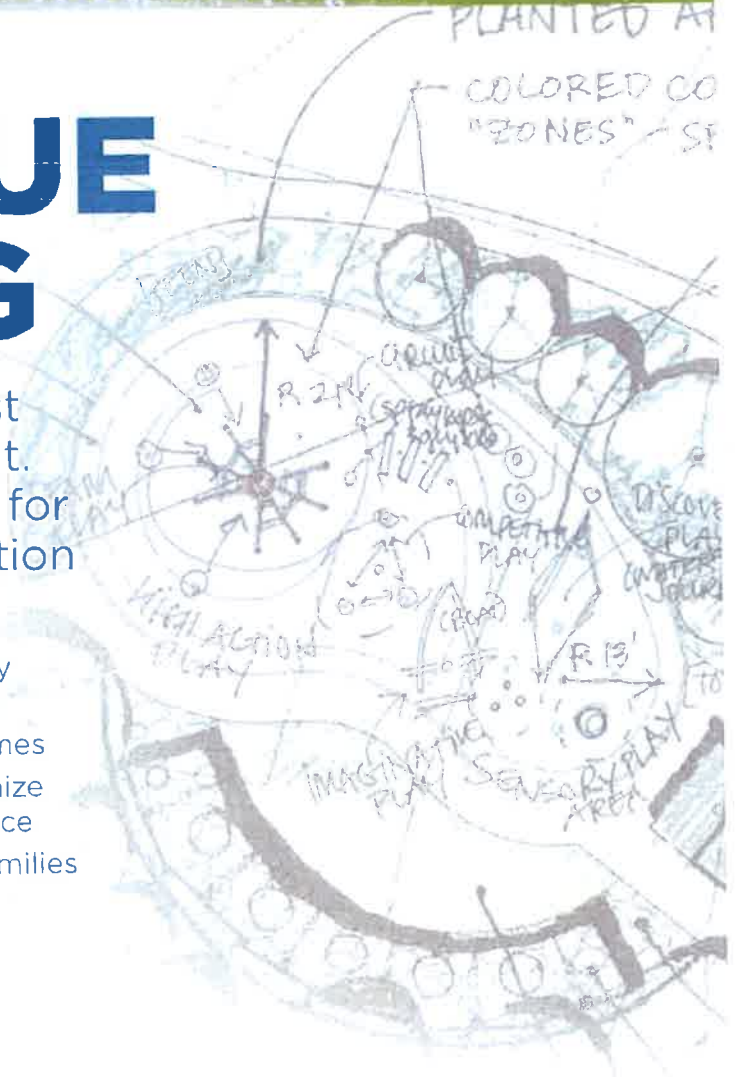

PLAY VALUE PLANNING

Aquatic play success doesn't just happen, you have to design for it. We optimize all our installations for your user mix, site size and location and other specific needs by...

- ✓ Seamlessly integrating multiple types of play experiences for different age groups
- ✓ Keeping play engaging to lengthen dwell times
- ✓ Integrating a diversity of products to maximize play value and enhance the overall experience
- ✓ Creating everlasting memories that bring families back again and again

LET'S PLAY!

IMPORTANT

1 Exact location of existing water inlet is required. Design is preliminary and subject to change based on information provided

2 Reinforced concrete slab is required below Elevations structure. Refer to General Specifications on page 13

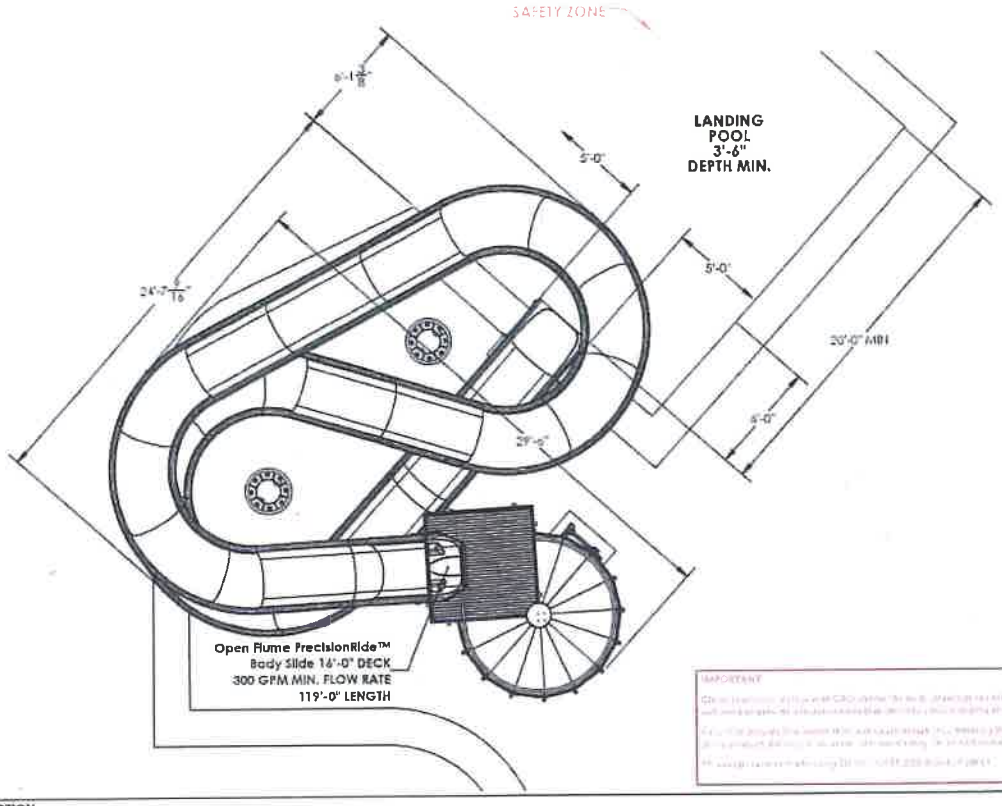

3 Minimum ceiling height of 16'-5" is required over Elevations

IMPORTANT

Client to provide Vortex with CAD and/or "As Built" drawings to establish the pool floor slope. If this is impossible, client will need to provide site dimensions that identify various depths at the Elevations structure location

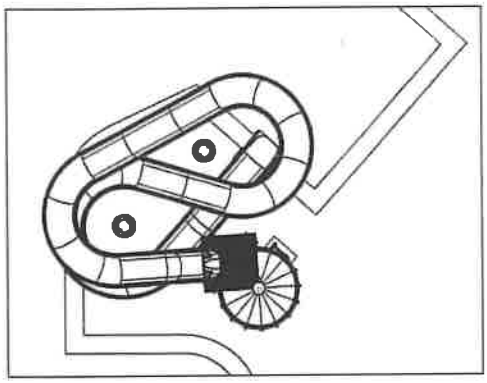

Failure to provide this information will cause delays in completing the submittal documents. Fabrications drawings and may delay product delivery. Inaccurate information may cause additional site work at client's expense

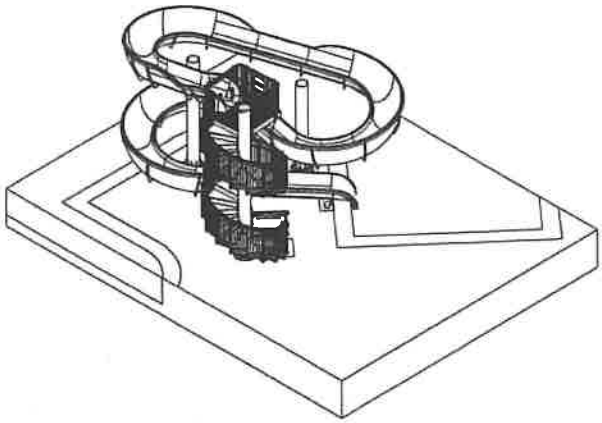

This proposal was made using PDF file: PL3-20 w measurements.pdf

3. FOR FURTHER DETAILS AND INFORMATION, REFER TO THE INSTALLATION, OPERATION, AND MAINTENANCE MANUALS.

1 PLAN VIEW - HEX DECK (ELEVATIONS)

2 FOR POOL REFURBISHMENT
4" (100mm) MANIFOLD WITH SIDE FLANGE WATER CONNECTION AND LEVELING STUDS

Elevations™ Simplified Materials Specifications

1. Structural Tubing: Tubing shall be type 304/304L stainless steel pipes, schedule 10 minimum and highly resistant to corrosive environments. Main support posts shall be made of 4.5" (11.4cm) stainless steel pipe.
2. Decks and Stairs: All decks & stairs shall be constructed from 12 GA (.105" [2.6mm]) minimum 304/304L stainless steel sheet perforated for better drainage. Deck and Stair protective coating shall integrate an anti-skid surface suitable for bare feet use.
3. Protective coating / Painted Finish: All stainless steel parts, except noted, shall be coated with a Super Durable grade heat-cured polyester powder coating that offers superior UV, gloss and chemical resistance; and is suitable for high traffic environments. Super Durable coating offers superior properties for long lasting durability and protection for indoor and outdoor high traffic environments compared to regular outdoor polyester powder coating and outdoor liquid coating.
4. SeeflowTM Polymer parts: Polymer plastic parts shall be constructed of SeeflowTM Polymer material exclusively developed for the aquatic play environment. It shall be a diaphanous (transparent) plastic that has a high resistance to impact, is highly resistant to vandalism, and is flame retardant. The SeeflowTM polymer shall have outstanding dimensional stability, chemical resistance, UV stability, and exceptional translucence.
5. Barrier Panels: Shall be constructed from highly resistant and durable polycarbonate material. Material shall be UV treated for maximum durability and resistance. Barrier Panels shall be designed to prevent kids from climbing and be see-through. They should be available clear or with transparent colored graphics. Barrier Panels shall be ½" (12mm) thick minimum.
6. Railing Barrier (if applicable): Shall be constructed of type 304/304L stainless steel pipes, schedule 10 minimum and highly resistant to corrosive environments. The barrier shall be safely constructed to prevent kids from climbing.
7. Below Deck Barrier: Hex Deck, Octa Deck and Stairs, without sufficient head clearance to circulate underneath, shall have see-through barriers constructed from highly resistant and durable polycarbonate material to prevent people from going underneath. Waterslides without sufficient head clearance shall be blocked off with netting. The netting shall be a black polyester netting with 2" inch (50mm) mesh openings. Each structure shall have a locking device to allow authorized access to valves underneath the deck.
8. Nozzles: Shall be manufactured from lead-free Brass and/or 304/304L Stainless Steel and/or Ultra-High Molecular Weight Polyethylene (UHMW) highly resistant to UV, water and corrosive environments. Nozzles shall be exempt of hazardous substances, lead or harmful chemicals.
9. Toe Guards: Shall be constructed of the colored Soft Touch Elastomer developed exclusively for the aquatic play environment in order to cover the anchoring assembly hardware from pinch points and protrusions. Toe Guards shall have flexible rubber-like characteristics, a matte highly durable and slip-resistant finish, with excellent UV and chemical resistance.
10. Waterslide – PrecisionRide™ with LRTM Process: PrecisionRide™ series 36-inch (91.4 cm) Open and 32-inch (81.3 cm) Close flume fiberglass slides shall be manufactured using a Resin Transfer Molding (LRTM) system by Vortex. At least 90% of all fiberglass flume parts are to be LRTM with both sides having a 600-grit surface finish or better. Standard flume section shall have a minimum thickness of 0.23 inch (5 mm) and joint flanges a minimum 0.35 inch (9 mm) thickness. Finish surface shall be high quality isophthalic polyester colored gelcoat and resin shall be premium quality vinylester providing improved resistance to osmosis blistering. All glass reinforcement shall be E Glass type or better. Interior and exterior of the fiberglass flume to have a minimum 0.018 to 0.20 inch (0.45 to 0.50 mm) gelcoat thickness. Slides shall have integral fiberglass runout lane slide exit if possible. WaterSlide over 6' (1.8m) shall be designed and manufactured in accordance with international standard ASTM F2376, European standard EN1069-1 or Chinese standard GB 18168 according to the project.
11. Waterslides– Classic with Hand Lay-up/Spray-up process: All 22-inch (55.9 cm) Kiddie Slide, Family Slide, 36-inch (91.4 cm) Open flume, 30.75-inch (78.1 cm) Open flume, 31.625-inch (80.3 cm) Close flume and Raft Slide shall be manufactured with an open mold hand lay-up/Spray-up process using high quality isophthalic polyester colored gelcoat and a polyester resin system with isophthalic and orthophthalic resins. Fiberglass reinforcements shall be continuous roving chop fibers, woven roving and shall be "E" glass type. Standard flume section shall have a minimum thickness of 0.25-inch (6.4 mm) and joint flanges a minimum 0.35-inch (9 mm) thickness. Interior of the fiberglass flume (riding surface) to have a minimum 0.018 to 0.20-inch (0.45 to 0.50 mm) gelcoat thickness with a 600-grit smooth finish. Exterior faces to be coated with a color urethane UV protective coating. Slides shall have integral fiberglass runout lane slide exit if possible.
12. Mounting and Assembly Hardware: All hardware shall be made of high corrosion resistance 316/316L stainless steel grade to offer the best durability and protection.
13. Safety Craftsmanship: All edges shall be machined to a rounded edge. All welds shall be smoothed, watertight and factory pressure tested. Water sprays nozzles shall be designed to prevent any protrusion or recessed. All Elevations aquatic play structures shall be designed and manufactured in accordance with Vortex Quality Management System registered under ISO-9001:2015, international industry safety standards ASTM F2461 and F2376 or European safety standard EN 13451-8 and EN 1069-1 according to the project.

PrecisionRide™ & Classic Waterslides & Structures - Simplified Materials Specifications

1. Slide sections – PrecisionRide RTM Process: PrecisionRide™series 36-inch (91.4 cm) Open and 32-inch (81.3 cm) Close flume fiberglass slides shall be manufactured using a Resin Transfer Molding (RTM) system or Vacuum Assisted Resin Transfer Molding (VARTM) system by Vortex. At least 90% of all fiberglass flume parts are to be RTM with both sides having a 600-grit surface finish or better. Standard flume section shall have a minimum thickness of 0.23-inch (6 mm) and joint flanges a minimum 0.35 inch (9 mm) thickness. Finish surface shall be high quality isophthalic polyester colored gelcoat and resin shall be premium quality vinylester providing improved resistance to osmosis blistering. All glass reinforcement shall be E Glass type or better. Interior and exterior of the fiberglass flume to have a minimum 0.018 to 0.20-inch (0.45 to 0.50 mm) gelcoat thickness. Slides shall have integral fiberglass runout lane slide exit if possible.
2. Slides sections – Classic Hand Lay-up process: All 22-inch (55.9 cm) Kiddie Slide, Family Slide, 36-inch (91.4 cm) Open flume, 30,78-inch (78.1 cm) Open flume, 31,625-inch (80.3 cm) Close flume and Raft Slide shall be manufactured with an open mold hand lay-up process using high quality isophthalic polyester colored gelcoat and a polyester resin system with isophthalic and orthophthalic resins. Fiberglass reinforcements shall be continuous roving chop fibers, woven roving and shall be "E" glass type. Standard flume section shall have a minimum thickness of 0.25-inch (6.4 mm) and joint flanges a minimum 0.35-inch (9 mm) thickness. Interior of the fiberglass flume (riding surface) to have a minimum 0.018 to 0.20-inch (0.45 to 0.50 mm) gelcoat thickness with a 600-grit smooth finish. Exterior faces to be coated with a color urethane UV protective coating. Slides shall have integral fiberglass runout lane slide exit if possible.
3. Joints, Connections, and Seams: Flume to flume joints shall be fastened with 3/8-inch stainless steel hardware. Flume to support system connections shall be made with stainless steel hardware. Fiberglass joint connections shall be made using waterproof non-shrink caulking with suitable adhesion to fiberglass.
4. Flume Structural Support System: Structural steel support columns, arms, and cross bracing as required by the design, shall be designed for bolt-up installation. Connection hardware and yokes, as required by the design, shall be stainless steel, nuts, bolts, and washers. Yokes for connecting flumes to structural elements shall be 1/4-inch-thick galvanized steel angle.
5. Waterslide Tower and Stairway System: Tower columns, cross-bracing, tension rods, stairway supports, stairway sections, railings and guardrails shall be hot-dipped galvanized steel and designed and prefabricated for bolt-up installation. A hinged gate located at the base of the waterslide tower shall be included. Railings and Guardrails infill shall be either square bar pickets or Polycarbonate SeeflowTM Polymer barrier panel (clear or patterned as specified) 1/2-inch thick and approved for exterior use and safety glazing. The outer frame/ring of the railings and guardrails shall be hot-dip galvanized steel. Grabrails or handrails shall be hot-dip galvanized steel.
6. Stair Treads, Landings and Decks: Shall be pultruded pedestrian fiberglass grating with a light gray color non-slip surfacing with 18% openings providing a comfortable walking surface. Fiberglass grating shall be low maintenance, corrosion resistant and fire retardant according to ASTM E84.
7. Structural Systems: Structural supports, tower and walkway systems shall be designed for: Seismic zone (as required per location of the project), Wind speed (according to project location), Snow load (according to project location) and Live load (according to project or default live load of 100 pounds per square foot).
8. Pipe Columns: All steel pipe columns shall meet the requirements of ASTM A53.
9. Tubing: All rectangular or square steel tubing shall meet the requirements of ASTM A500, Grade B.
10. Bolts and Nuts: Where required all high strength bolts shall meet the requirements of ASTM A325.
11. Anchor bolts: All anchor bolts shall be hot-dip galvanized steel and shall meet the requirements of ASTM A36.
12. Protective Coatings and Colors: Waterslide steel support structure shall be hot-dip galvanized steel standard (according to ASTM A123) and coated with multi-step process including a zinc-rich primer and a heat-cured powder coating SuperDurable grade top coat compliant with AAMA 2604 for weathering resistance of architectural exterior applications. Top coat shall be emitting no VOC's and shall be free of phthalates, isocyanates, halogens and heavy metals.
13. Safety signage: Sign shall be durable, non-corrosive, rigid plastic or aluminum material suitable for exterior installations.
14. Platform cover: Platform cover structural frame members shall use same materials and steel protection as slide structure. Bolts and nuts shall be stainless steel per ASTM F593, Alloy Group 1 or 2 and Anchor bolts shall be hot dip galvanized and meet the requirements of ASTM A36. Platform cover shall be designed for Live loads: 10 pounds per square foot, Wind design speed: 80 miles per hour, Snow load: 5 pounds per square foot. Shade fabric shall be made of high-density polyethylene with ultraviolet additives and a fire rating Class 1 (flame spread index of 15 and smoke developed index of 15).
15. Safety Craftsmanship: All waterslides and their structure shall be designed and manufactured in accordance with Vortex Quality Management System registered under ISO 9001:2015, international industry safety standards ASTM F2376, European safety standard EN 13451-8 and EN 1069-1 or GB 18168 according to the project requirements.

WATERSLIDES DESIGNS EXCEEDING STANDARDS

ASTM F2376 - 06 Standard for Waterslide Design and Operation
ASTM INTERNATIONAL

IBC International Building Code

World Waterpark Association (WWA) Guidelines

WATERSLIDES FEATURES OVERVIEW

canopy

Shades and fabric canopy offer 95% UV protection

spiral stairway

Three shade covers are offered as standard features at no extra charge

premium coating

Premium finish coat over hot-dip galvanized steel resists corrosion

AquaGRATE® decking

Standard on all stair and deck surfaces for improved comfort and safety for bare feet – a must in high traffic aquatic areas

wide stairways

Wide stairway 65" (1.6m) offering 46" (1.2m) free and clear between ADA safety rails

built-in water chambers

Allows for smooth and continuous introduction of water into rider path

runouts

Pool-less runouts are a safe, high capacity alternative to plunge pools

built-in highwalls

One-piece 330° high-wall curves with no unsightly or dangerous bottoms or built-up sections

safety signage

Safety signage for all waterslides details proper procedures and sliding techniques for maximum safety and fun

lockable gates

On all waterside towers and stairs to restrict access when waterslide is not in use

safety entry

Sit down bars on each waterslide ensure safe entry and sliding

high grade gelcoats

High grade gelcoats for a smooth, low-maintenance finish inside and out

VORTEX

World leader in aquatic play solutions

VORTEX-INTL.COM | INFO@VORTEX-INTL.COM
1.877.586.7839 (USA/CANADA)

Engineered for performance and manfactured with state-of-the-art technology, Vortex's new **PrecisionRide™ series** offers the ultimate waterslide experience with unmatched smooth, comfortable rides.

superior appearance

- Superior glossy finish inside and out
- Consistent thickness
- Smooth, frictionless connections for an enhanced riding experience

high strength - light weight

- PrecisionRide™ series flumes have the highest strengthto-weight ratios in structures today

durability & perfomance

- Long life, low maintenance
- Corrosion resistant
- Thermal & electrical insulation properties

maximum design flexibility

- Ride paths can be designed to accommodate your unique space and facility requirements

Vortex also conforms to other applicable standards including but not limited to: ASTM F2783, EN 13451-3, CSA Z267, ADA USA federal regulations. Please inquire for your specific project.

SUSTAINABLE DEVELOPMENT

DURABILITY OF OUR PRODUCTS

Our features are designed to last and require little maintenance

Stainless steel 304/304L	25-year guarantee
Coloured thermosetting polyester powder coating	Withstands heat, extreme climates and UV rays

RECYCLED MATERIALS

Transport materials	• Fully degradable and recyclable • non-toxic bubble wrap • Boxes made of recycled cardboard
Manufacturing waste	We annually recycle: • Metal: 45,360 kg (100,000 lbs) • Plastic: 454 kg (1,000 lbs) • Wood: 9,072 kg (20,000 lbs)

WATER MANAGEMENT

Optimization of water consumption	• Low water consumption nozzles • Activators powered on demand

DIGITIZATION

To reduce waste and promote eco-responsible management of its activities, Vortex has begun a transition to zero-paper offices by favoring the use of digitized platforms for the marketing, production, and design teams.

MATERIALS

Vortex uses premium materials and adheres to the highest quality manufacturing standards. This ensures that products are reliable, durable and vandalism-resistant.

STAINLESS STEEL

Vortex employs stainless steel as its primary material of Construction. The structural strength and corrosion resistant properties of stainless steel make it ideal for all features, anchoring systems and hardware. Vortex stainless steel consists of at least 25% post-consumer recycled content, with several products containing as much as 90% or higher recycled content. Additionally, stainless steel is 100% recyclable allowing for Vortex equipment to be part of a sustainable solution.

SEEFLOW™ POLYMER

The bright translucent colors of Vortex's Seeflow™ polymer creates some of the most visually stimulating aquatic play products available. Unique to Vortex, Seeflow™ is a high-strength, flexible material with extremely high impact and flammability resistance. It's long lasting properties including resistance to UV rays and chemical exposure make it suitable for both indoor and outdoor installation. The combination of bright color, water and sunlight create an enchanting visual experience. Manufactured with up to 40% pre-consumer recycled materials, and reusable at end of life makes the Vortex Seeflow™ a truly unique option.

ALUMINUM

Vortex employs aluminum on certain mechanical equipment such as equipment vaults and water containment systems, as well as certain accent components like interactive handle spheres and counter weights. The light weight yet strong properties of aluminum make it ideal for this application and all aluminum components are chemically treated and painted to provide a lasting finish.

BRASS

Spray heads, ground sprays and nozzles on select above-grade products are machined from solid stock brass, lead-free for long term durability. To maintain high quality standards without risking galvanic corrosion, Vortex only uses 304L grade stainless steel housings. As part of Vortex's waste reduction efforts, all leftover brass is recycled.

VORTEX

MATERIALS

SOFT-TOUCH ELASTOMER

Vortex's unique Soft Touch elastomer - used in the Toeguard™ system - keeps little toes safe. The Toeguard™ was specifically developed with this material to provide protection from anchoring hardware. The high tensile strength material provides resistance to impact and chemicals, while providing a soft, non-slip surface to absorb unintentional knocks from toes and feet. The UV- stable color is impregnated through the thickness of the Toeguard™ and as a result, abrasion will not remove the color.

DURABLE COLOR COATINGS SYSTEM

The color process employed for coating our stainless steel structures is baked on lead-free powder coat with UV resistance that holds its color in intense sun and harsh climates. This protection means that colors stay vibrant over time and prevents minor cracks which can lead to corrosion.

FIBERGLASS

Some Vortex products are constructed of high impact resistant fiberglass with a resistant gel coat and clear coat coloring system. As part of the Vortex Water Containment System lining, lightweight and durable fiberglass offers the additional benefits of preventing leaching and providing a clean environment for water.

HIGH DENSITY POLYETHYLENE (HDPE)

HDPE panels provide colorful accent to many other Vortex water features. HDPE provides excellent UV, heat, chemical and impact resistance.

ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE (UHMWPE)

Some components of our water features use UHMWPE which provides excellent UV, heat, chemical and impact resistance. As part of Vortex's waste reduction efforts all products using UHMWPE are recyclable.

© 2018 Vortex Aquatic Structures International

VORTEX LIMITED WARRANTY

PUBLISHED OCTOBER 2019

THIS LIMITED WARRANTY REPLACES AND SUPERSEDES ALL PREVIOUS VERSIONS

All Vortex Aquatic Structures International ("Vortex") aquatic play equipment is designed and manufactured to the highest standards of quality and workmanship. Vortex warrants that all its products will be free of defects in manufacturing, workmanship and material for the coverage periods listed below only if the specified environmental parameters are met and none of the exclusions apply.

REGISTRATION

All warranties commence on the date of Vortex's invoice. Should any failure to conform to the warranties appear within the applicable warranty coverage periods, Vortex shall, upon being notified in writing promptly after discovery of the defect and within the applicable warranty period, correct such nonconformity either by repairing any defective part or parts, or by making available a replacement part within 90 days of written notification.

COVERAGE PERIODS

25 YEARS	10 YEARS	5 YEARS	2 YEARS	1 YEAR
• Stainless steel tubing	• Structural Stainless Steel* • Weld workmanship	• Aluminum • Brass • Polymer Panels	• Finishes • Galvanized steel structures • Plumbing Components • Mechanism & Hardware • Polymer	• Concrete Components • Electrical Components • Paint graphic & Decal • Polymer composite

**Stainless steel used for climbable structures or used to hold a minimum weight of 240 lbs.*

EXCLUSIONS TO LIMITATIONS

Except as expressly set out herein, all warranties provided by the manufacturers and distributors of components, equipment, and parts ("Manufacturer") on products are hereby assigned to the owner, to the extent permitted by the Manufacturer, as the owner's sole and exclusive remedy with respect to such items. Any assistance by Vortex and/or its authorised partners with regard to component warranties shall not constitute an adoption of the responsibilities of a component manufacturer with regard to its component warranties. This Limited Warranty also does not apply to the following items:

1. Careless manipulation (including but not limited to mishandling, repackaging and transport) of Vortex equipment (products, systems, subassemblies and parts);
2. Exceeding product and system design capacities;
3. Misapplication, abuse, misuse, and/or operation of the equipment outside the parameters described in the user manual and/or design layouts provided by Vortex;
4. Failure to ensure that the structures and/or equipment are only subjected to normal use for the purpose for which the products were designed;
5. Failure to erect and/or install products according to the installation and assembly instructions provided by Vortex;

VORTEX LIMITED WARRANTY, CONT.

6. Addition or substitution of parts or modification of any type to Vortex equipment or components unless approved by Vortex in writing;
7. Use of non-original manufacturer replacement parts;
8. Subjecting the structures and/or equipment to modification, alteration, or repair by persons other than the Seller or Seller's designees in any respect which, in the judgment of the Seller, affects the condition or operation of the structures and or components;
9. Products, equipment and parts that are exposed to water chemistry profiles outside environmental parameters and swimming pool industry standards;
10. Failure to properly winterize equipment according to best practices and the procedures and documentation provided by Vortex, including but not limited to improper drainage in freezing conditions;
11. Accidental damage, fire, acts of God or other circumstances outside the control of Vortex;
12. Personal injury due to improper use of Vortex equipment;
13. Vandalism;
14. Failure or Neglect to carry out regular inspection and maintenance of Vortex equipment according to best practices and the procedures and documentation provided by Vortex taking into account its frequency of use and the surrounding environmental conditions;
15. Product installed within 500 yards of saltwater shoreline will be covered for half the period of the standard warranty up to a maximum of 5 years, for defects caused by corrosion;
16. Damage or deterioration of cosmetic surface finishes, including cracking, crazing, discoloration, air voids, fading, or oxidation of gel coat, fabrics, vinyls, plastics, painted items or stainless steel finishes.

CLAIMS

To make a claim, please contact your local representative or send your written statement of claim, along with the original project number and/or project name to Vortex by

Email: support@vortex-intl.com
Mail: Vortex Aquatic Structures International, 7800 Trans Canada, Pointe-Claire, QC, H9R 1C1, Canada
Fax: +1.514.989.0413

To contact Vortex with any questions or comments with regards to this warranty, call 1.877.586.7839 (free USA/CANADA) or +1.514.694.3868 (INTERNATIONAL) or send email to support@vortex-intl.com.

To contact Vortex with general questions or comments, call 1.877.586.7839 (free USA/CANADA) or +1.514.694.3868 (INTERNATIONAL) or send email to info@vortex-intl.com.

Vortex Aquatic Structures International is not liable for any incidental expenses, inconvenience or loss due to warranty claims. For approved warranty replacements, Vortex shall deliver the repaired or replacement part or parts via economical ground shipping free of charge for one year from the date of the seller's invoice. After that period, shipping charges will be incurred by the client. Vortex will not be responsible for providing labor or the cost of labor for the removal of the defective part or parts and the installation of any replacement part or parts. Replacement parts will be warranted for the balance of the original warranty. In no event shall Vortex have any liability or responsibility for any special, indirect, incidental, consequential or exemplary damages or for lost profits or costs for removal and installation required to perform repairs or replacements, including any labor, travel and rental equipment costs arising out of this warranty or any other agreement, the transactions contemplated hereby, the products or the use of the products.

Modified Warranty

Project Name: Federal Way Community Center Refurbishment – WA, USA

Vortex Aquatic Structures International warrants that all its products will conform in kind and quality to the specifications set forth in the specifications sheet for the products, and will be free of defects in manufacturing and material; under normal use and service for the periods set forth below:

5 Year Warranty on stainless steel structures, stainless steel anchoring systems and weld workmanship in an indoor application.

5 Year Warranty on brass components including: spray nozzles. spray caps and spray heads, high-density polyethylene components, polyurethane components, and ultra-high molecular weight polyethylene components.

3 Year Warranty all moving parts, stainless steel hardware, fiberglass products, Seeflow™ polymer products, and the Toeguard™, made of soft-touch elastomers.

2 Year Warranty on finishes, galvanized steel, electrical components and fiberglass composite.

In the case of product approval and procurement, the standard warranty will be issued starting from the date of the take-over certificate provided this happens within 12 months from the date the goods leave the factory. Replacement parts will be warranted for the balance of the original warranty. With regards to defects covered by this warranty, Vortex shall repair or replace the defective part or parts, F.O.B. Vortex. All costs for removal and installation required to perform repairs or replacements shall be the responsibility of the purchaser.

CITY OF FEDERAL WAY
MEMORANDUM

DATE: February 14, 2022

TO: City Council Members

VIA: Jim Ferrell, Mayor

FROM: Thomas Fichtner, IT Director

SUBJECT: Purchase of Endpoint Security Software

Financial Impacts:

The cost to the City for this Endpoint Security Software is not to exceed $45,000 annually. Included in the IT Department's 2021/2022 adopted budget is $45,000 annually for security software, this purchase would be utilizing those funds.

The current price for this offering is $60/endpoint/year plus tax. The City will be covering all of the current endpoints with this solution.

Background Information:

As the security/threat/risk landscape for technology continues to evolve, our systems for protecting the City's technology infrastructure need to evolve along with it.

This offering provided by the Center for Internet Security, Inc. (CIS), is a white-labeled offering of a top-tier software product. The advantage to this offering is that the Security Operations Center (SOC) is monitoring the data that is being reported by the endpoints 24/7/365. This is a huge advantage over competing solutions as many of them rely on City IT staff to continuously monitor the software for any security incidents that come up.

The City is a member of the Multi State Information Sharing and Analysis Center (MS-ISAC), which is partnered with the U.S. Department of Homeland Security as well as the U.S. Computer Emergency Readiness Team (US-CERT). The MS-ISAC is a division of CIS, and thus the City is eligible to purchase this offering which can only be purchased from CIS. CIS is a registered 503(c)(3) non-profit organization.

CITY OF FEDERAL WAY
MEMORANDUM

DATE: February 22, 2022
TO: FEDRAC Committee
VIA: Jim Ferrell, Mayor
FROM: EJ Walsh, P.E., Public Works Director
SUBJECT: ***Purchase of Snow and Ice Equipment***

FINANCIAL IMPACTS:

No general fund impacts are proposed.

This is the capital costs for the initial Purchase of Snow and Ice Equipment, proposed to be completed using available AARPA funding, including:

- Material Stacker: $145,000
- 2 5-yard trucks with salt spreader/brine systems: $760,000
- Urea (salt) one time: $90,000

The equipment costs include purchase, taxes and delivery. Per City policy, the trucks and heavy equipment are capitalized over a 12 year period instead of the standard 7 year period for smaller vehicles. The capitalization costs will be from Surface Water and Streets operating funds. No impacts to the overall funds are proposed.

The urea cost is a one-time increase in supply at the Operations and Maintenance Facility to be able to commence the requested increase in service. On an annual basis Public Works returns to City Council to replenish the supply based on what was actually used for events.

BACKGROUND:

After the onset of the 2021-2022 winter season, Public Works was asked to research and report back on what would be required to increase our capacity to plow within neighborhoods and the associated support that would be required.

After review, the main hurdle is urea storage. We have adequate capacity with a material stacker in the existing bins, however without that equipment we would need to construct a new storage facility. Upon review, that would be both more expensive and we do not have the physical room currently to construct, therefore a material stacker was proposed. The same stacker will be able to be used for other materials throughout the year by both Public Works and Parks.

For trucks, 2 5-yard trucks (the smaller of our full-size plow trucks) would be required to treat the neighborhood collectors and smaller streets. These are trucks that both Parks and Public Works would utilize year-round. We are very short on full size flex trucks to complete year-round work, so that would greatly help both departments.

To operate the trucks 24/7 requires 2.3 FTEs per truck. We do not currently have the staff to support additional trucks. The 5 staff members are proposed to be spread between Fleet (2 FTEs), Streets (1 FTE),

SWM (1 FTE) and Parks (1 FTE). With the lead time associated with the trucks, this can be included during the next budget cycle, no action on this portion is required.

The material stacker is quoted through the Sourcewell (formerly NJPA) Purchasing Contract (Federal Purchasing Contract).

For the trucks, to obtain the lowest cost, multiple procurement contracts are being utilized. Both trucks are quoted through the Sourcewell (formerly NJPA) Purchasing Contract (Federal Purchasing Contract) and the upfitting for both is quoted through the Washington State Purchasing Contract.

The City has an existing contract through the Washington State Purchasing Contract for urea which will be increased to purchase the required urea.

CITY OF
Federal Way

MEMORANDUM

To: City Council

Via: Mayor Jim Ferrell

From: Brian Davis, Interim City Administrator

Date: March 1, 2022

Subject: Employee Retention Incentive

At your February 15 regular meeting, the Council discussed a potential two-time annual retention incentive for City employees using funds from the American Rescue Plan Act (ARPA). The item had been forwarded for approval by the Parks, Human Services, and Public Safety Committee. The matter was continued to the March 1 regular meeting and was discussed informally at the February 22 Finance, Economic Development, and Regional Affairs Committee. All discussions by the Council have all been in support of the incentive, but there is not yet consensus on whether to use a percentage-of-salary calculation or a flat rate.

The Mayor's recommendation was and still is to use the percentage option at 2.5 percent of base salary. A flat-rate option would not likely be effective at actual retention unless the incentive amount was high enough to entice the more difficult-to-fill senior positions, likely in the $3,000-5,000 range, and if the incentive were part of a larger, long-term retention strategy (e.g., COLA policy, salary adjustment, workload analysis). Today's highly competitive job market combined with our lower wages yield greater employee turnover than most cities. When senior-level employees leave, more work must be spread across a greater number of employees. Therefore, the intent of this proposal is to help retain a greater number of employees whose departures create the most disruption to city operations.

To further illustrate the importance of retaining senior employees, please consider the following comparison between a custodian and police lieutenant. The difference between the percentage and flat-rate models is significant as shown by the conversion of the three flat-rate options discussed by the Council to a percentage model:

	Step C Salary	% of salary @ $2500	% of salary @ $3000	% of salary $5000
Custodian	$45,000	5.56%	6.67%	11.11%
Police Lieutenant	$130,000	1.92%	2.31%	3.85%

Furthermore, the process of filling a senior-level position like lieutenant is significantly more expensive to the City than a position like custodian. And from a time perspective, it takes at least six months – from vacancy to fully-oriented new hire – to replace a lieutenant, whereas a custodian could be replaced in a few days.

Following are different incentive options for the Council to consider based on your feedback at the three meetings mentioned earlier. There are 369 regular positions, nine of which are part time, and we currently have 19 vacancies. Seasonal and temporary positions are not part of this proposed incentive. The calculations do not consider whether a position is full time or part time or if the employee started employment during the year. Those amounts were not significant enough to drill down at this point, but they will be when implemented. In other words, the estimates below are slightly higher than actual, all regular employees will receive the incentive whether full time or part time, and pro-rated amounts for employees who start after January 1 will be handled on an individual basis after the incentive is implemented.

Option 1: 2.5% of base salary	
2022 total incentive	$925,943
2023 total incentive	$962,981
Total	$1,888,924
Longevity incentive (>5 yrs) of $500	$209,000

Option 2: $2,500 flat rate	
2022 total incentive	$922,500
2023 total incentive	$922,500
Total	$1,845,000
Longevity incentive (>5 yrs) of $500	$209,000

Option 3: $3,000 flat rate	
2022 total incentive	$1,107,000
2023 total incentive	$1,107,000
Total	$2,214,000
Longevity incentive (>5 yrs) of $500	$209,000

Option 4: $5,000 flat rate	
2022 total incentive	$1,845,000
2023 total incentive	$1,845,000
Total	$3,690,000
Longevity incentive (>5 yrs) of $500	$209,000

If one of the flat-rate options is selected, it is recommended that employees starting after January 1 be given a pro-rated incentive based on the number of full months worked before July 1. For example, someone starting May 2 would receive 7/12 of the incentive in December while an employee starting July 2 would not receive an incentive for that calendar year. For regular part-time employees, it is recommended the flat rate be given at the percentage of full-time status. For example, a regular employee who works 27 hours per week would be given 27/40 of the incentive. The longevity bonus would be given to employees who have worked at least five years at the City on January 1 of the year of the bonus.

As mentioned earlier, it is important that this incentive not be considered the sole solution to employee retention. It won't solve our retention problem by itself, but it can as part of a larger retention strategy that the Council should begin thinking about as we enter budget season this fall.

The Mayor recommends Option 1 for employees hired before July 1 in the year of the incentive, with a $500 longevity bonus for employees with more than five years of employment with the City.

CITY OF FEDERAL WAY
CITY COUNCIL COMMITTEE STAFF REPORT

DATE:	January 20, 2022
TO:	Parks, Recreation, Human Services and Public Safety Council Committee
VIA:	Jim Ferrell, Mayor
FROM:	Andy J. Hwang, Chief of Police
SUBJECT:	Monetary retention incentive for City of Federal Way employees

Financial Impacts:

The problems this proposal seeks to alleviate are related to the COVID pandemic; therefore, we recommend using ARPA funds.

The cost of this proposal for recommendation #1 (all city employees) is $773,410 per year. The cost of this proposal for recommendation #2 (police department only) is projected to be $368,771 per year.

There are three alternatives to ARPA: expense savings, additional revenue, or general fund reserves. With the unbudgeted items, projects, and initiatives already committed this year, all the known expense savings and additional revenues are spoken for. After year-end auditing is finished, there may be a possibility that the city ends up with savings from 2021, but it is premature at the moment to know.

Another option is 2022 is paid with ARPA funds; and 2023's incentive could theoretically be incorporated proactively into the 2023-24 budget.

Background Information:

Members of City Council recently expressed interest in authorizing retention pay for Federal Way Police Department (FWPD) employees. The incentive is intended to recognize the 24/7/365 nature of FWPD operations, staffed by people who physically come to work throughout an enduring pandemic, which simultaneously coincides with a difficult socio-political time for law enforcement in the United States in general.

Finding enough willing and qualified people to fill vacant positions in law enforcement is always difficult. That difficulty is doubly exacerbated by the external forces mentioned above. Since early to mid-2020, police and sheriff's departments throughout the country have struggled with recruiting and retention. The Puget Sound area is no exception. As Federal Way experiences these difficulties, the Council reaffirms public safety is the highest governmental concern.

Hiring and training new police employees is labor intensive and expensive. The process of recruiting, background investigation, and professional testing for a police applicant often takes

2+ months. Entry-level police officers attend a 5+ month basic law enforcement academy. All officers, whether new academy graduates or experienced lateral officers, go through our 3+ month field training program. Each retained employee avoids the costly backfill associated with this lengthy evolution. Retaining highly trained and experienced employees is a significant financial advantage and benefit to the city.

Recruiting competition among law enforcement agencies is more competitive than ever. Accordingly, advantages to keeping incumbent officers have multiplied. While hiring bonuses have become standard, some agencies are now offering retention incentives.[1]

Recommendation #1:

COVID has work-related impacts for all city employees. Retaining experienced employees in *all* departments has similar logistical and financial benefits to the city. To approve this "stay here" incentivize for all city employees (including police), the projected total cost is $773,410 for 2022. For both years the total cost is $1,546,820, plus the presently unknown wage increase differentials in 2023.

We recommend implementing the incentive in this manner:

1. For personnel employed on January 1, 2022, the City will pay a monetary retention incentive in the amount of 2.5% of the employee's base salary if the employee is still employed with no separation in service as of December 1, 2022.
2. For personnel employed on January 1, 2023, the City will pay a monetary retention incentive in the amount of 2.5% of the employee's base salary if the employee is still employed with no separation in service as of December 1, 2023.
3. In order for an employee to be eligible for the monetary incentive they must actually work (be present in the work place) for a minimum of 1,250 hours from January 1 to December 1 during the year being incentivized.
4. The monetary retention incentive is based solely on the employee's base salary and does not include overtime, specialty pay, or other compensation.
5. Applicable incentive pay will be paid to a qualifying employee in the last pay period of December of the qualifying year.

Recommendation #2:

Approve the retention incentive for police employees, using the guidelines described under recommendation #1. The first-year cost is projected to be $368,771. (Commissioned police officers: $321,946. Civilian staff: $46,825.) The two-year cost is $737,542, plus wage increase differentials in 2023.

1 The City of Everett is one recent example. Effective for 2022, Everett's retention incentive is for commissioned police officers, parking enforcement officers, property room specialists, and records specialists.

CITY OF FEDERAL WAY
CITY COUNCIL
AGENDA BILL

SUBJECT: LODGING TAX ADVISORY COMMITTEE APPOINTMENT

POLICY QUESTION: Should the City Council appoint a new member to the Lodging Tax Advisory Committee?

COMMITTEE: N/A **MEETING DATE:** N/A

CATEGORY:

☐ **Consent**	☐ **Ordinance**	☐ **Public Hearing**
☒ **City Council Business**	☐ **Resolution**	☐ **Other**

STAFF REPORT BY: Stephanie Courtney, City Clerk **DEPT:** Mayor's Office

Background:

The Lodging Tax Advisory Committee (LTAC) is comprised of a minimum of five (5) members who are appointed by the City Council to serve two-year terms. Per FWRC 2.75.020, members must represent businesses that are required to collect lodging tax or businesses authorized to be funded by lodging tax revenues (a minimum of two each).

There are currently three (3) vacant voting position representing businesses collecting lodging tax for which two applications were received. At their March 1, 2022 Special Meeting the City Council interviewed the only applicant available for interview: Mike Dunwiddie with King County Aquatic Center.

Options Considered:

1. Appoint Mike Dunwiddie as a voting member of the Lodging Tax Advisory Committee with a term to expire October 31, 2023.

2. Direct the City Clerk to advertise for additional applicants for the Lodging Tax Advisory Committee.

MAYOR'S RECOMMENDATION: Option 1

MAYOR APPROVAL: N/A (Committee Initial/Date) 2/24/22 (Council Initial/Date) **CITY CLERK APPROVAL:** 2/24/2022 (Initial/Date)

PROPOSED COUNCIL MOTION: *"I move to appoint Mike Dunwiddie as a voting member of the Lodging Tax Advisory Committee with a term to expire October 31, 2023."*

SUBJECT: STEEL LAKE MANAGEMENT DISTRICT ADVISORY COMMITTEE APPOINTMENTS

POLICY QUESTION: Should the City Council appoint members to the Steel Lake Management District Advisory Committee?

COMMITTEE: N/A **MEETING DATE:** N/A

CATEGORY:

- ☐ **Consent** ☐ **Ordinance** ☐ **Public Hearing**
- ☒ **City Council Business** ☐ **Resolution** ☐ **Other**

STAFF REPORT BY: Stephanie Courtney, City Clerk **DEPT:** Mayor's Office

Background: The Steel Lake Management District Advisory Committee is comprised of four (4) lake residents/property owners, one multi-family property representative, one city representative, and one Department of Fish and Wildlife representative. Per City of Federal Way Resolution Number 13-649, these members are appointed by the City Council to serve two-year terms.

There are currently four (4) vacant voting positions for lake residents/property owners due to term expirations. At their March 1, 2022 Special Meeting the Council interviewed three (3) applicants seeking reappointment (Mark Sabol, Margaret Reyhner, and Tom Dezutter) and one (1) new applicant (Jeremy Benson).

Options Considered:

1. Make appointments to the Steel Lake Management District Advisory Committee as follows:

Name	Position	Term
1.	Voting Member	Expires 12/31/2023
2.	Voting Member	Expires 12/31/2023
3.	Voting Member	Expires 12/31/2023
4.	Voting Member	Expires 12/31/2023

2. Direct the City Clerk to advertise for additional applicants for the SLMDAC.

RESOLUTION NO. _____

A RESOLUTION of the City of Federal Way, Washington, declaring the City of Rivne, Ukraine as a Sister-city.

WHEREAS, from time to time the City of Federal recognizes international cities as Sister-Cities; and

WHEREAS, City of Federal Way Council Resolution 95-197 outlines selection criteria for determining those cities that are appropriate to be named as a Sister-City of the City; and

WHEREAS, the City of Rivne, Ukraine, and the City of Federal Way, Washington have established a deep and abiding friendship based on shared cultural values and a respect for one another; and

WHEREAS, the city of Rivne, Ukraine, has a proud and long history, with a market economy known to be a high-tech industrial base, and has expressed an interest to share cultural and business exchanges with the City of Federal Way; and

WHEREAS, the City of Rivne and the City of Federal Way share important national political interests toward the betterment of our people with a strong commitment to human rights and a commitment to continued development between our communities; and

WHEREAS, the people of the City of Federal Way, Washington, United States of America, stand in solidarity with the People of Rivne, Ukraine, against assaults on democracy, unlawful acts of war waged by an aggressive and unstable dictator, and stand for the sovereignty of Ukraine.

NOW THEREFORE, THE CITY COUNCIL OF THE CITY OF FEDERAL WAY, RESOLVES AS FOLLOWS:

Section 1. The City of Rivne, Ukraine is hereby designated as a Sister-City of the City of

Federal Way.

Section 2. Severability. If any section, sentence, clause or phrase of this resolution should be held to be invalid or unconstitutional by a court of competent jurisdiction, such invalidity or unconstitutionality shall not affect the validity or constitutionality of any other section, sentence, clause, or phrase of this resolution.

Section 3. Corrections. The City Clerk and the codifiers of this resolution are authorized to make necessary corrections to this resolution including, but not limited to, the correction of scrivener/clerical errors, references, resolution numbering, section/subsection numbers and any references thereto.

Section 4. Ratification. Any act consistent with the authority and prior to the effective date of this resolution is hereby ratified and affirmed.

Section 5. Effective Date. This resolution shall be effective immediately upon passage by the Federal Way City Council.

RESOLVED BY THE CITY COUNCIL OF THE CITY OF FEDERAL WAY, WASHINGTON this _____ day of _____, 20__.

James Rogers, Senior Planner

Subject: Ordinance: Proposed Code Amendments: Public Transportation Facilities
Files: 21-103529-UP, 21-103530-SE

I. FINANCIAL IMPACTS

There is no financial impact to the City for this code update. This is a non-project proposal.

II. BACKGROUND

Community Development is seeking to amend Title 19 of the Federal Way Revised Code. These proposed code amendments are to allow Light Rail or Commuter Rail Transit Facilities as a specified permitted use within the Commercial Enterprise (CE) and City Center Core (CC-C) zones. These facilities are currently allowed in these zones as Essential Public Facilities. This proposed change would allow the city to apply more specific controls through development regulations for that use, where currently they are allowed more broadly as essential public facilities. Specifically, the revised code would require that transit stations provide a minimum number of parking spaces for users of the facility.

III. PROPOSED CODE AMENDMENTS

Code Amendment 1 – City Center Core – New Land Use Chart

Allow the addition of "Light Rail or Commuter Rail Transit Facility" as a permitted use under a new code number **19.225.105 Public Transportation Facilities.** (See Exhibit 1)

Code Amendment 2 – Commercial Enterprise – New Land Use Chart

Allow the addition of "Light Rail or Commuter Rail Transit Facility" as a permitted use under a new code number **19.240.135 Public Transportation Facilities.** (See Exhibit 1)

Code Amendment 3 – New Definition

Add a new definition to **19.05.120 L definitions** to read;

"*Light rail or commuter rail transit facility*" means a structure or other improvement of a regional light rail or commuter rail transit system, which includes ventilation structures, traction power substations, utilities serving the regional transit system, transit stations and related passenger amenities, bus layover and inter-modal passenger transfer facilities, parking garages, park and rides, tunnel portals, storage track and support facilities, and transit station access facilities.

Code Amendment 4 – New Definition

Add a new definition to **19.05.200 T definitions** to read;

"Transit Station" means an off-street at-grade, under-, or above-street-level rail or light-rail, ferry terminal, bus hub, or bus transfer facility for stopping of transit vehicles to pick up and drop off passengers. A transit station usually has boarding/alighting platforms, waiting area(s), fare collection, information, and related facilities.

Code Amendment 5 – Text Amendment

Amend the text of **19.105.020 Essential Public Facilities** to read:

(1) *Generally.* The review and siting of essential public facilities shall conform to the following:

(a) Class I facilities shall be reviewed under the zoning provisions found in their respective zoning districts, as well as the special provisions outlined in subsection (2) of this section. Review of Class I facilities shall be under process IV, hearing examiner decision.
(b) Class II facilities shall be reviewed under the zoning provisions and processes found in their respective zoning districts, unless they are found to be exempt under the Federal Fair Housing Act, in which case such exemption does not imply an exemption from applicable building or structural standards.

IV. SEPA - Determination of Nonsignificance (DNS)

The city's Responsible Official has determined that this non-project proposal does not have a probable significant adverse impact on the environment, and an Environmental Impact Statement (EIS) is not required under RCW 43.21C.030(2)(c). The required 60-day notice was posted with the Dept. of Commerce on August 25, 2021. SEPA documentation for this proposal can be found at https://docs.cityoffederalway.com/weblink/browse.aspx?id=865525&dbid=0&repo=cityoffederalway.

V. Public Notice and Public Comment

The proposed code amendments to development regulations and the text of Title 19 FWRC, is currently under public review in compliance with Process VI review, Chapter 19.80 FWRC, pursuant to Chapter 19.35 FWRC.

Notice of DNS was posted in the Federal Way Mirror on Friday August 27, 2021 starting the 14-day public comment period, which ended on September 10, 2021. The 21-day appeal period ended on October 1, 2021. Comments were received from Sound Transit on September 10. 2021 (Exhibit 3). Staff has provided responses to those comments (Exhibit 4). Staff worked with Sound Transit to modify the text within the zone charts and come to mutual agreement.

Public hearing regarding this proposal will be held February 15, 2022 at City Council, as allowed in 19.080.190(1) FWRC. Notice was posted at least 14 days in advance of the hearing date.

Staff has made minor changes to the ordinance since it was originally posted, and since being reviewed by LUTC on October 4, 2021. Addendums to the original SEPA DNS documents were posted with the Department of Commerce on January 28, 2022. New public notice and comment periods are not required, per Department of Ecology guidance and WAC 197-11-600(4)(c).

VI. DECISIONAL CRITERIA

FWRC 19.80.130 provides criteria for development regulation amendments. The following section analyzes the compliance of the proposed amendments with the criteria provided by FWRC 19.80.130. The city may amend the text of the FWRC only if it finds that:

1. The proposed amendment is consistent with the applicable provisions of the comprehensive plan.

Staff Response – The proposed code amendment is consistent with the following goals and policies:

NEG12 *Promote land use patterns and transportation systems that minimize air pollution and greenhouse gas emissions.*

TP6.4 The City will continue to cooperate with regional and local transit providers to develop facilities that make transit a more attractive option.

CCG9 Provide a balanced transportation network that accommodates public transportation, high occupancy vehicles, pedestrians, bicyclists, automobiles, and integrated parking.

CCG15 Work with transit providers to develop a detailed HCT plan for the City Center. Identify facilities, services, and implementation measures needed to make transit a viable and attractive travel mode. Tailor the plan to meet local needs through rapid transit, express buses, and/or demand-responsive service.

CCP29 Integrate the high capacity transit system with other transportation modes serving Federal Way and the region.

CCP33 Encourage public and private parking structures (below or above ground) in lieu of surface parking. As redevelopment occurs and surface parking becomes increasingly constrained, consider a public/private partnership to develop structured parking in the downtown commercial area.

CCP34 Encourage the provision of structured parking.

2. The proposed amendment bears a substantial relationship to public health, safety, or welfare.

   Staff Response – The proposed code amendments bear a substantial relationship to public welfare as it will ensure that the parking demand generated by the transit stations do not adversely impact nearby properties.

3. The proposed amendment is in the best interest of the residents of the city.

   Staff Response – The proposed code amendments are in the best interest of the city as a whole because it codifies current city practices, addresses emerging land use issues, and increases code clarity, simplicity, and efficiency of the development review process.

VII. RECOMMENDATION

The Mayor recommends adopting the proposed ordinance for minor amendments to Title 19, Title of the *Federal Way Revised Code* (FWRC) as shown above and in Exhibit 1.

ORDINANCE NO. _____

AN ORDINANCE of the City of Federal Way, Washington, relating to Public Transportation Facilities; amending FWRC 19.05.120, 19.05.200, and 19.105.020; and adding new sections to Chapters 19.225 and 19.240 FWRC. (Amending Ordinance Nos. 17-834, 15-804, 09-630, 09-610, 09-593, and 97-295)

WHEREAS, the City of Federal Way ("City") recognizes the need to periodically modify Title 19 of the Federal Way Revised Code ("FWRC"), "Zoning and Development Code," in order to conform to state and federal law, codify administrative practices, clarify and update zoning regulations as deemed necessary, and improve the efficiency of the regulations and the development review process; and

WHEREAS, this ordinance, containing amendments to development regulations and the text of Title 19 FWRC, has complied with Process VI review, Chapter 19.80 FWRC, pursuant to Chapter 19.35 FWRC; and

WHEREAS, it is in the public interest for the City Council to adopt a new permitted land use for the City Center Core (CC-C) and Commercial Enterprise (CE) zones and establish development regulations for Light Rail or Commuter Rail Transit Facilities within the City; and

WHEREAS, the Central Puget Sound Regional Transit Authority ("Sound Transit") is proceeding to implement their Sound Transit 3 ("ST3") light rail system expansion, with two light rail stations planned within the City; and

WHEREAS, the Federal Way Link Extension ("FWLE") portion of ST3 is currently under construction, with a new light rail station being built at the Federal Way Transit Center ("FWTC") in the CC-C zone; and

WHEREAS, the planned parking facility expansion, designed to accommodate the new added demand from light rail users at the FWTC, has not yet been constructed; and

WHEREAS, the Tacoma Dome Link Extension ("TDLE") is currently in the planning phase; and

WHEREAS, a preferred alternative route alignment and station location has been identified by Sound Transit in the CE zone in South Federal Way; and

WHEREAS, the demand for parking for transit-related parking proximate to the new stations will occur as soon as the stations are in operation; and

WHEREAS, there are no public parking facilities available to accommodate the parking demand created by the transit stations; and

WHEREAS, the proposed use is already generally allowed in the City as an essential public facility; and

WHEREAS, the City's comprehensive plan vision, goals and policies strive to ensure transit station areas develop into efficient transportation centers that serve all travel modes, including cars; and

WHEREAS, adding Light Rail or Commuter Rail Transit Facilities to the City's development regulations will help ensure that stations are developed in a complete and functional manner, not piecemeal; and

WHEREAS, the City's measurement of transit level of service ("LOS") considers the provision of adequate parking at transit stations to be necessary in order to meet minimum LOS standards; and

WHEREAS, an Environmental Determination of Nonsignificance ("DNS") was properly issued for the Proposal on August 27, 2021, and no appeals were received and the DNS was finalized on October 1, 2021; and

WHEREAS, an Addendum To Environmental Determination of Nonsignificance ("DNS") was properly issued on February 1, 2022, to incorporate minor modifications to the zone charts for City Center Core (CC-C) and Commercial Enterprise (CE), and an added definition for Transit Station; and

WHEREAS, the Planning Commission properly considered these code amendments on September 15, 2021, and forwarded a recommendation of approval to the City Council; and

WHEREAS, the Land Use & Transportation Committee of the City Council considered these code amendments on October 4, 2021, and recommended adoption of the text amendments as recommended by the Planning Commission; and

WHEREAS, the City Council properly conducted a duly noticed public hearing on these code amendments on February 15, 2022, and March 1, 2022.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF FEDERAL WAY, WASHINGTON, DO ORDAIN AS FOLLOWS:

Section 1. Findings. The City Council of the City of Federal Way makes the following findings with respect to the proposed amendments.

(a) The above recitals are hereby restated and adopted as findings.

(b) These code amendments are in the best interest of the residents of the City and will benefit the City as a whole by ensuring that transit stations are developed in a complete and functional manner, become an amenity to the people they serve, and do not burden local businesses and communities.

(c) These code amendments comply with Chapter 36.70A RCW, the Growth Management Act.

(d) These code amendments are consistent with the intent and purpose of Title 19 FWRC and will implement and are consistent with the applicable provisions of the Federal Way Comprehensive Plan.

(e) These code amendments bear a substantial relationship to, and will protect and not adversely affect, the public health, safety, and welfare.

(f) These code amendments have followed the proper procedure required under the FWRC.

Section 2. Conclusions. Pursuant to Chapter 19.80 FWRC and Chapter 19.35 FWRC, and based upon the recitals and the findings set forth in Section 1, the City Council makes the following Conclusions of Law with respect to the decisional criteria necessary for the adoption of the proposed amendments:

(a) The proposed FWRC amendments are consistent with, and substantially implement, the following Federal Way Comprehensive Plan goals and policies:

NEG12 Promote land use patterns and transportation systems that minimize air pollution and greenhouse gas emissions.

TP6.4 The City will continue to cooperate with regional and local transit providers to develop facilities that make transit a more attractive option.

CCG9 Provide a balanced transportation network that accommodates public transportation, high occupancy vehicles, pedestrians, bicyclists, automobiles, and integrated parking.

CCG15 Work with transit providers to develop a detailed HCT plan for the City Center. Identify facilities, services, and implementation measures needed to make transit a viable and attractive travel mode. Tailor the plan to meet local needs through rapid transit, express buses, and/or demand-responsive service.

CCP29 Integrate the high capacity transit system with other transportation modes serving Federal Way and the region.

CCP33 Encourage public and private parking structures (below or above ground) in lieu of surface parking. As redevelopment occurs and surface parking becomes increasingly constrained, consider a public/private partnership to develop structured parking in the downtown commercial area.

CCP34 Encourage the provision of structured parking.

(b) The proposed FWRC amendment bears a substantial relationship to the public health, safety, and welfare because it will ensure that transit stations are developed as complete and effective public facilities, with a greater ability to provide the public with a faster, safer, and cleaner mode of transportation, while reducing congestion on the public roadways.

(c) The proposed amendment is in the best interest of the public and the residents of the City of Federal Way because it helps to ensure that transit stations are developed in a complete and functional manner, becoming a multi-modal amenity to the people they serve.

Section 3. FWRC 19.05.120 is hereby amended to read as follows:

19.05.120 L definitions.

"Land division" means any process by which individual lots, parcels, or tracts are created for the purpose of sale, lease, or transfer. Land divisions include, but are not limited to, conventional subdivisions (both short and long plats), binding site plans, cluster subdivisions, cottage housing, zero lot line townhouse development, and small lot detached development.

"Landscaping" means the planting, removal and maintenance of vegetation along with the movement and displacement of earth, topsoil, rock, bark and similar substances done in conjunction with the planting, removal and maintenance of vegetation.

"Landward" means toward dry land.

"Legal nonconformance" means those uses, developments, or lots that complied with the zoning regulations at the time the use, development, or lot was created or established, but do not conform with current zoning regulations. This definition shall be applied to legal nonconforming lots, uses, and developments as defined in this chapter.

"*Light rail or commuter rail transit facility*" means a structure or other improvement of a regional light rail or commuter rail transit system, which includes ventilation structures, traction power substations, utilities serving the regional transit system, transit stations and related passenger amenities, bus layover and inter-modal passenger transfer facilities, parking garages, park and rides, tunnel portals, storage track and support facilities, and transit station access facilities.

"Linear frontage of subject property" means the frontage of the subject property adjacent to all open, improved rights-of-way other than Interstate 5. If the subject property is not adjacent to an open, improved right-of-way, "linear frontage" means the frontage of the subject property on any public access easements or tracts which serve the subject property and adjacent unopened and/or unimproved rights-of-way.

"Lobby" means a central hall, foyer, or waiting room at the entrance to a building.

"Lot" means a parcel of land, of sufficient area to meet minimum zoning requirements, having fixed boundaries described by reference to a recorded plat, to a recorded binding site plan, to metes and bounds, or to section, township and range.

"Lot area" means the minimum lot area per dwelling unit based on the underlying zone. For single-family lots, the area of a vehicular access easement, private tract, flagpole, or access panhandle shall not be credited in calculation of minimum lot area.

"Low density use" means a detached dwelling unit on a subject property that contains at least five acres.

"Low density zone" means the following zones: SE and comparable zones in other jurisdictions.

"Low impact development (LID)" means a stormwater management strategy that emphasizes conservation and use of existing features integrated with distributed, small-scale stormwater controls to more closely mimic natural hydrologic patterns in residential, commercial, and industrial settings.

Section 4. FWRC 19.05.200 is hereby amended to read as follows:

19.05.200 T definitions.

"Temporary personal wireless service facility" means a personal wireless service facility which is to be placed in use for a limited period of time, is not deployed in a permanent manner, and does not have a permanent foundation.

"Tenant improvement" means any work, improvement or remodeling completely within the interior of a building necessary to meet the varied requirements of continuing or succeeding tenants.

"Threshold determination" means the decision by the responsible official (the community development services director) whether or not an environmental impact statement (EIS) is required for projects that are not categorically exempt under the State Environmental Policy Act (SEPA).

"Topping" means a pruning cut to the main stem of a mature tree. Such cuts can result in serious decay and/or forcing out growth of weakly attached upright sprouts below the cut. Topping also results in permanent alteration of tree architecture. For purposes of this chapter, topping shall be treated the same as tree removal.

"Topsoil" means the uppermost strata of soil containing a large percentage of organic materials and which is capable of providing suitable nourishment for vegetation.

"Townhouse" means a type of attached multifamily dwelling in a row of at least two such units in which each unit has its own front and rear access to the outside, no unit is located over another unit, and each unit is separated from any other unit by one or more vertical common fire-resistant walls. See definition of "dwelling unit, townhouse."

"Trade school" means a post-secondary institution that trains persons for qualification in specific trades or occupations, i.e., mechanics; construction trades such as carpentry, HVAC, and wiring; electronics repair and service including computers; plumbing; chefs and culinary training; upholstery; bartending.

"Traffic control devices" means signs, signals, stripes and other mechanical or graphic items which control the flow, direction or speed of vehicular and pedestrian traffic.

"Transit Station" means an off-street at-grade, under-, or above-street-level rail or light-rail, ferry terminal, bus hub, or bus transfer facility for stopping of transit vehicles to pick up and drop off passengers. A transit station usually has boarding/alighting platforms, waiting area(s), fare collection, information, and related facilities.

"Transparent glass" means windows that are transparent enough to permit a reasonable level of visibility of the activities within a building from nearby streets, sidewalks and public spaces.

"Tree" means any self-supporting perennial woody plant characterized by one main stem or trunk of at least six inches in diameter measured four and one-half feet above ground, or a multi-stemmed trunk system with a definite crown, maturing at a height of a least 20 feet above ground level.

"Tree unit" is a measurement to give value to the number of trees retained on a site. Table 19.120.130-2 assigns tree unit credits based upon the size of the existing or newly planted trees. For new trees, tree units vary depending on the size that the trees will reach at maturity (smaller size at maturity, fewer tree unit credits).

"Trees, deciduous" means trees that shed or lose their foliage at the end of the growing season.

"Trees, evergreen" means trees that retain their leaves for more than one growing season.

Section 5. FWRC 19.105.020 is hereby amended to read as follows:

19.105.020 Essential public facilities.

(1) *Generally.* The review and siting of essential public facilities shall conform to the following:

(a) Class I facilities shall be reviewed under the zoning provisions found in their respective zoning districts, as well as the special provisions outlined in subsection (2) of this section. Review of Class I facilities shall be under process IV, hearing examiner decision~~under process IV, hearing examiner decision. Project review shall also include those special provisions outlined in subsection (2) of this section~~.

(b) Class II facilities shall be reviewed under the zoning provisions and processes found in their respective zoning districts, unless they are found to be exempt under the Federal Fair Housing Act, in which case such exemption does not imply an exemption from applicable building or structural standards.

(2) *Site evaluation criteria.* The following criteria will be utilized in evaluating siting proposals made by sponsoring agencies or organizations seeking to site Class I essential public facility in Federal Way. These criteria encompass an evaluation of regional and/or local need and local site suitability for the proposed facility. Findings concerning the proposal's conformance with each criteria shall be included in the documentation of any city decision relative to the project.

(a) *Demonstration of need.* Project must establish the need for their proposed facility. Included in the analysis of need should be the projected service population, an inventory of existing and planned comparable facilities, and an assessment of demand for this type of essential public facility.

(b) *Relationship of service area to population.* The facility should service a share of Federal Way's population within the city. The proposed site should also be in a location that reasonably serves its over-all service area population.

(c) *Minimum site requirements.* Project sponsors shall submit documentation showing the minimum site requirement needs for the facility. Site requirements may be determined by any or all of the following parameters: Minimum size of the facility, access, necessary on-site support facilities, topography, geology and soils and mitigation requirements. The sponsor shall also identify any future expansions of the facility.

(d) *Alternative site selection.* The sponsor shall document whether any alternative site have been identified that meet the minimum site requirements of the facility. Where a proposal involves expansion of an existing site, the documentation should indicate why relocation of the facility to another site would be infeasible.

(e) *Concentration of essential public facilities.* In considering a proposal, the city shall examine the overall concentration of these facilities within the city to avoid placing undue burden on any one neighborhood.

(f) *Public participation.* Sponsors shall conduct local outreach efforts with early notification to prospective neighbors to inform them about the project and to engage local residents in site planning and mitigation design prior to the initiation of formal hearings.

(g) *Proposed impact mitigation.* The proposal must include adequate and appropriate mitigation measures for the impacted area and neighborhood. Mitigation measures may include, but are not limited to, natural features that may serve as buffers, other site design elements used in the development plan, and/or operational or other programmatic measures contained in the proposal. The proposed measures should be adequate to substantially reduce or compensate for anticipated adverse impacts on the local environment.

Section 6. Chapter 19.225 Sections is hereby amended to read as follows:

Chapter 19.225

CITY CENTER CORE (CC-C)[1]

Sections:

19.225.010 Office use.
19.225.015 Breweries, distilleries, and wineries.
19.225.020 Retail use.
19.225.030 Retail shopping center, regional.
19.225.040 Entertainment.
19.225.050 Hotel, convention or trade centers.
19.225.060 Parking garages.
19.225.070 Multifamily dwelling units, senior citizen, or special needs housing.
19.225.080 Hospital – Convalescent centers – Nursing homes.
19.225.090 Schools – Day care facilities, commercial.
19.225.100 Government facility, public parks, public transit shelter.
19.225.105 Public transportation facilities.
19.225.110 Public utility.
19.225.120 Personal wireless service facility.
19.225.130 Churches.
19.225.140 Urban agriculture.

Section 7. Chapter 19.225 of the Federal Way Revised Code is hereby amended to add a new section 19.225.105 to read as follows:

19.225.105 Public transportation facilities.

The following uses shall be permitted in the commercial enterprise (CE) zone subject to the regulations and notes set forth in this section:

USE / REGULATIONS	USE ZONE CHART DIRECTIONS: FIRST, read down to find use . . . THEN, across for REGULATIONS							ZONE CC-C SPECIAL REGULATIONS AND NOTES
	Required Review Process	Minimums				Maximum Height of Structure	Min. Required Parking Spaces	
		Lot Size	Required Yards					
			Front	Side (each)	Rear			
Light Rail or Commuter Rail Transit Facility	Process IV, See note 17.	None	0 ft. Except 20 ft. along Single-Family residential zones	0 ft.	0 ft.	75 ft. above average building elevation (AABE) See notes 1 and 2	500 Spaces for light rail or commuter rail facilities with transit stations. See notes 13, 14, 15, 16, and 17.	1. If approved by the director, the height of a structure may exceed 75 ft. above average building elevation (AABE), if the increased height is necessary to accommodate the structural, equipment, or operational needs of the use. 2. Building height may not exceed 75 ft. AABE when located within 100 ft. of a Single-family residential zone. 3. The proposed development will be consistent with the adopted comprehensive plan policies for this zone. 4. Minor and supporting structures constructed as a functional requirement of a facility may be allowed at the same height as the primary structure, provided the Director of Community Development Services determines that the facility and any related supporting structures will not significantly impact adjacent properties. 5. The subject property must be designed so that truck parking, loading, and maneuvering areas; areas where noise generating outdoor uses and activities may occur; and vents and similar features are located as far as possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot coverage applies. Instead, the buildable area will be determined by other site development regulations, i.e., required yards, landscaping, surface water facilities, etc. 8. For regulations pertaining to outdoor use, activity and storage, refer to FWRC 19.125.170. 9. For community design guidelines that apply to the project, see Chapter 19.115 FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125 FWRC. 11. For sign requirements that apply to the project, see Chapter 19.140 FWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.265 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and off-street parking, projected changes to transit ridership, traffic (vehicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19.130.080(2).

	14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station access and parking study. The phased parking plan must specify the percentage of required transit parking access to be accommodated at the time of Certificate of Occupancy issuance for the transit station, any applicable milestone years for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking plan. The phased parking plan must be consistent with the findings of the access and parking study and the approval criteria in FWRC 19.130.080(2). An agreement shall be executed between the city and applicant, prior to issuance of building permits, to ensure station access and parking services are provided consistent with the phased parking plan. 15. In general, surface parking shall not be permitted. Surface parking may be permitted if the director determines that the proposed surface parking achieves comprehensive plan and/or subarea plan goals and policies, and: a. Structured parking cannot adequately accommodate the provision of limited purpose parking such as ADA parking spaces, short term parking spaces, and electric charging stations; or b. The proposed location of surface parking is on land with low redevelopment potential, such as under a railway, where structured parking would be impractical; or c. The potential exists for the future conversion of the proposed surface parking, including parking provided in accordance with a phased parking plan under Note 14, to structured parking as part of a transit-oriented development, public private partnership, or similar means of redevelopment, and the applicant and the City have executed an agreement specifying the date when, or conditions under which, the surface parking shall be converted to structured parking if no redevelopment occurs. 16. Parking required by this chapter shall be no more than 800 feet from the proposed transit station. The distance shall be measured along a city-approved pedestrian path from the transit station entrance to the closest public pedestrian entrance to the parking facility. The director may grant a modification to the maximum distance between parking required and the proposed transit station based on consideration of how pedestrian weather protection, crosswalk improvements, lighting, street trees, sidewalk width, and wayfinding are able to facilitate seamless access integration, as well as the approval criteria of FWRC 19.130.090. Notwithstanding the foregoing, the applicant may enter into a shared parking agreement with another property owner to utilize existing surplus parking on properties located within 800 feet of the facility, or where a direct transit link (e.g. bus, shuttle, etc.) will be provided between the parking and the transit facility, to satisfy a portion or all of the parking requirement. Shared parking is subject to the approval criteria of FWRC 19.130.120. Shared parking is not subject to the requirements of Note 15. 17. Project will be reviewed as a Class 1 Essential Public Facility, refer to FWRC 19.105.020(2).
Process I, II, III and IV are described in Chapter 19.55 FWRC, Chapter 19.60 FWRC, Chapter 19.65 FWRC, Chapter 19.70 FWRC respectively.	For other information about parking and parking areas, see Chapter 19.130 FWRC. For details of what may exceed this height limit, see FWRC 19.110.050 et. seq. For details regarding required yards, see FWRC 19.125.160 et seq.

Section 8. Chapter 19.240 Sections is hereby amended to read as follows:

Chapter 19.240

CITY CENTER CORE (CC-C) [1]

Sections:

19.240.010 Manufacturing and production, general.
19.240.020 Warehouse – Distribution – Storage facilities – Truck stops – Automotive emissions testing facilities.
19.240.030 Commercial photography – Communications – Product testing – Industrial laundry facilities.
19.240.040 Hazardous waste treatment and storage – Chemical manufacturing – Gravel batch plant – Transfer station.
19.240.050 Vehicle, boat, equipment, and outdoor storage container sales, rental, service, repair – Self-service storage – Tow and taxi lots.
19.240.060 Retail – Bulk retail.
19.240.070 Retail, general and specialty – Manufacturing and production, limited.
19.240.080 Office uses.
19.240.090 Hotels – Motels.
19.240.100 Business, vocational, trade schools – Day care facilities, commercial – Animal kennels.
19.240.110 Entertainment – Generally.
19.240.115 Breweries, distilleries, and wineries.
19.240.120 Entertainment – Adult entertainment, activity, retail, or use (adult uses).
19.240.125 Public utility.
19.240.130 Government facilities, public parks, public transit shelter.
19.240.135 Public transportation facilities.
19.240.140 Personal wireless service facilities.
19.240.160 Churches.
19.240.170 Urban agriculture.
19.240.180 Group homes.

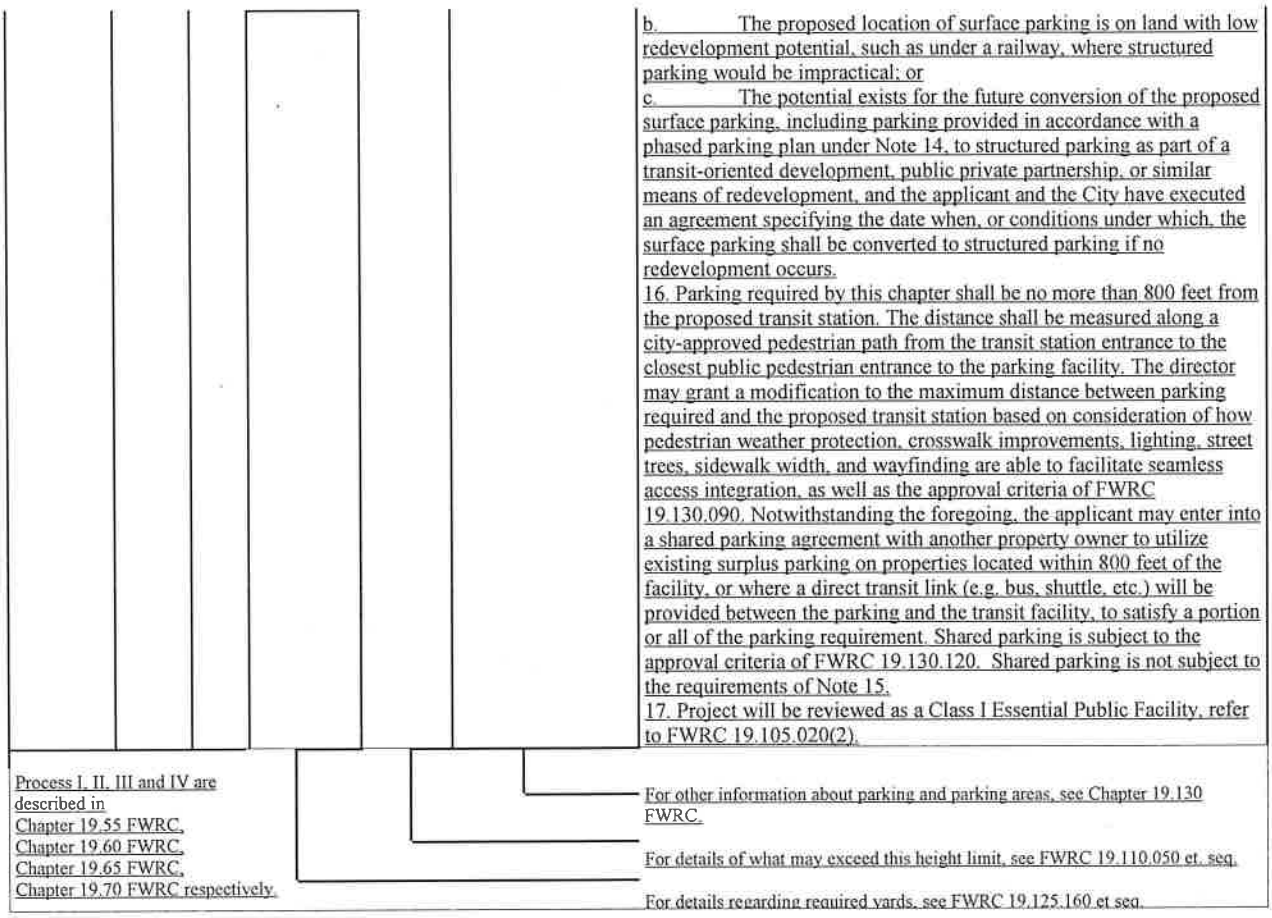

Section 9. Chapter 19.240 of the Federal Way Revised Code is hereby amended to add a new section 19.240.135 to read as follows:

19.240.135 Public transportation facilities.

The following uses shall be permitted in the commercial enterprise (CE) zone subject to the regulations and notes set forth in this section:

USE / REGULATIONS	USE ZONE CHART DIRECTIONS: FIRST, read down to find use . . . THEN, across for REGULATIONS							
	Required Review Process	Minimums				Maximum Height of Structure	Min. Required Parking Spaces	ZONE CE SPECIAL REGULATIONS AND NOTES
		Lot Size	Required Yards					
			Front	Side (each)	Rear			

Light Rail or Commuter Rail Transit Facility	Process IV, See note 17.	None	0 ft. / 0 ft. / 0 ft. Except 20 ft. along Single-Family residential zones	50 ft. above average building elevation (AABE) See notes 1 and 2	500 Spaces for light rail or commuter rail facilities with transit stations. See notes 13, 14, 15, 16 and 17.	1. If approved by the director, the height of a structure may exceed 50 ft. above average building elevation (AABE), if the increased height is necessary to accommodate the structural, equipment, or operational needs of the use. 2. Building height may not exceed 50 ft. AABE when located within 100 ft. of a Single-family residential zone. 3. The proposed development will be consistent with the adopted comprehensive plan policies for this zone. 4. Minor and supporting structures constructed as a functional requirement of a facility may be allowed at the same height as the primary structure, provided the Director of Community Development Services determines that the facility and any related supporting structures will not significantly impact adjacent properties. 5. The subject property must be designed so that truck parking, loading, and maneuvering areas; areas where noise generating outdoor uses and activities may occur; and vents and similar features are located as far as possible from any residential zone, conforming residential use, or natural systems. 6. The streets, utilities, and other infrastructure in the area must be adequate to support the proposed development. 7. No maximum lot coverage applies. Instead, the buildable area will be determined by other site development regulations, i.e., required yards, landscaping, surface water facilities, etc. 8. For regulations pertaining to outdoor use, activity and storage, refer to FWRC 19.125.170. 9. For community design guidelines that apply to the project, see Chapter 19.115 FWRC. 10. For landscaping requirements that apply to the project, see Chapter 19.125 FWRC. 11. For sign requirements that apply to the project, see Chapter 19.140 FWRC. 12. For other provisions of this chapter that may apply to the subject property, see Chapter 19.265 FWRC. 13. A reduction to the minimum required parking spaces may be allowed provided a transit station access and parking study is submitted as part of the development application for City-issued land use approval to inform any decisions regarding the reduction of parking. The scope of the study may include, but is not limited to: the existing supply, utilization, and availability of publicly accessible on-street and off-street parking, projected changes to transit ridership, traffic (vehicle trip generation), and area parking availability likely to result from any interim or alternative station access and parking scenarios. The director may grant, after consultation with the City Traffic Engineer, a modification to the minimum number of parking spaces based upon the result of the transit station access and parking study and the approval criteria in FWRC 19.130.080(2). 14. Provision of parking may be phased consistent with a phased parking plan included and analyzed in the transit station access and parking study. The phased parking plan must specify the percentage of required transit parking access to be accommodated at the time of Certificate of Occupancy issuance for the transit station, any applicable milestone years for provision of additional parking, and the frequency at which particular land use or transportation conditions will be evaluated for potential updates to the phased parking plan. The phased parking plan must be consistent with the findings of the access and parking study and the approval criteria in FWRC 19.130.080(2). An agreement shall be executed between the city and applicant, prior to issuance of building permits, to ensure station access and parking services are provided consistent with the phased parking plan. 15. In general, surface parking shall not be permitted. Surface parking may be permitted if the director determines that the proposed surface parking achieves comprehensive plan and/or subarea plan goals and policies, and: a. Structured parking cannot adequately accommodate the provision of limited purpose parking such as ADA parking spaces, short term parking spaces, and electric charging stations; or

Section 10. Severability. The provisions of this ordinance are declared separate and severable. The invalidity of any clause, sentence, paragraph, subdivision, section, or portion of this ordinance, or the invalidity of the application thereof to any person or circumstance, shall not affect the validity of the remainder of the ordinance, or the validity of its application to any other persons or circumstances.

Section 11. Corrections. The City Clerk and the codifiers of this ordinance are authorized to make necessary corrections to this ordinance including, but not limited to, the correction of scrivener/clerical errors, references, ordinance numbering, section/subsection numbers and any references thereto.

Section 12. Ratification. Any act consistent with the authority and prior to the effective date of this ordinance is hereby ratified and affirmed.

Section 13. Effective Date. This ordinance shall be effective five (5) days after passage and publication as provided by law.

Subject: Public Transport Facilities Code Amendment SEPA DNS Comments (City File No. 21-103530-SE)

Dear Mr. Rogers:

Sound Transit has reviewed the SEPA Determination of Non-Significance (DNS) and Environmental Checklist for the proposed code amendment to allow public transportation facilities in the City Center Core (CC-C) and Commercial Enterprise (CE) zones and associated parking requirements.

As you know, project alternatives for Sound Transit's Tacoma Dome Link Extension (TDLE) and Operations and Maintenance Facility South (OMF South) are currently under consideration in their respective Draft Environmental Impact Statements (DEIS) for each project. Portions of the project alternatives are located in the CC-C and CE zones. Additionally, while portions of the Federal Way Link Extension (FWLE) under construction are located in these zones, the project is vested to existing codes for 10 years from the execution of the Development Agreement (City of Federal Way Ordinance No. 19-869/Sound Transit Board Motion No. M2019-65). As such, the SEPA DNS and Environmental Checklist has not been reviewed for potential implications for the FWLE project.

Sound Transit provides the following initial comments for consideration based on our review of the SEPA DNS and Environmental Checklist materials:

- Sound Transit supports the collaborative and proactive effort to streamline permitting by specifying "light rail or commuter rail transit facility" uses as permitted uses in the CC-C and CE zones and clarifying what development standards are applicable to such uses.

- Would all portions of the TDLE and/or OMF South project in the CC-C and CE zones be affected by the proposed code amendment?

- Would portions of the TDLE and/or OMF South project outside of the CC-C and CE zones be affected at all by the proposed code amendment?

- The proposed definition of "light rail or commuter rail transit facility" is comprehensive. To avoid confusion over applicability of the proposed

development standards in the Use Zone Chart, we suggest clarifying that the minimum parking requirements apply only to those transit facilities open to the public and serving transit patrons.

- On August 5, 2021, the Sound Transit Board of Directors took action to realign the capital expansion program with a plan that allows the agency to manage the $6.5 billion affordability gap while working to deliver as much of the plan as soon as possible.

  Part of this action was to delay the delivery and opening of Sound Transit parking projects in the region, including the TDLE South Federal Way Station parking improvements to 2038. The action also included identifying opportunities to deliver flexible, innovative, and affordable ways for people to access transit stations. The impacts of deferred parking and associated mitigation measures will be evaluated in the TDLE DEIS. Is the intent that the standard for minimum 500 parking spaces "generally structured"/maximum 10% surface parking in the proposed code amendment be met on station opening day of service? If so, this will be in conflict with the Board of Director's August 5th action and could impede overall timely project delivery.

- The proposed Federal Way Revised Code (FWRC) Sections 19.225.105 Note 13 and 19.240.135 Note 13 address the potential for parking reductions from the minimum 500 parking spaces for "light rail…" How will the proposed code amendment affect, if at all, the processes available for evaluating potential deviations related to timing (phasing of parking), type of parking (structured vs. surface), and footprint of parking (variable per circulation needs, TOD integration opportunities, etc.)?

- We note that the SEPA Environmental Checklist in most cases states that this amendment is a non-project action and that specific impacts will be evaluated at the project level. However, there are some exceptions within some elements (e.g. regarding structure removal and displacement of people), and we wonder if this is intentional and the reason a distinction is made.

We appreciate the opportunity to comment on the SEPA DNS and Environmental Checklist and look forward to learning more about the proposed code amendment and to future collaboration on permit streamlining. Sound Transit staff will follow up with City staff in the near-term to continue our coordination effort.

Sincerely,

Karen Kitsis Digitally signed by Karen Kitsis Date: 2021.09.10 13:40:59 -07'00'

Subject: Public Transportation Facilities Code Amendment SEPA DNS Comments (File No. 21-103530-SE)

Dear Mrs. Kitsis:

Thank you for the comments dated September 10, 2021 provided on the city's SEPA Determination of Non-Significance (DNS) and the related Environmental Checklist for the proposed code amendments allowing public transportation facilities in the City Center Core (CC-C) and Commercial Enterprise (CE) zones. Allow the following to represent responses to those comments.

- Sound Transit supports the collaborative and proactive effort to streamline permitting by specifying "light rail or commuter rail transit facility" uses as permitted uses in the CC-C and CE zones and clarifying what development standards are applicable to such uses.

  Response: Noted.

- Would all portions of the TDLE and/or OMF South project in the CC-C and CE zones be affected by the proposed code amendment?

  Response: No, only those facilities that directly serve patrons of the transit system would be affected. Staff have included clarifying language in the proposed code to address this ambiguity.

- Would portions of the TDLE and/or OMF South project outside of the CC-C and CE zones be affected at all by the proposed code amendment?

  Response: No. These proposed amendments are limited to station areas within the CC-C and CE zones.

- The proposed definition of "light rail or commuter rail transit facility" is comprehensive. To avoid confusion over applicability of the proposed development standards in the Use Zone Chart, we suggest clarifying that the minimum parking requirements apply only to those transit facilities open to the public and serving transit patrons.

  Response: The City agrees with this comment and has included language to clarify the intent that the new code language apply only to facilities serving transit patrons.

- On August 5, 2021, the Sound Transit Board of Directors took action to realign the capital expansion program with a plan that allows the agency to manage the $6.5 billion affordability gap while working to deliver as much of the plan as soon as possible.

  Part of this action was to delay the delivery and opening of Sound Transit parking projects in the region, including the TDLE South Federal Way Station parking improvements to 2038. The action also included identifying opportunities to deliver flexible, innovative, and affordable ways for people to access transit stations. The impacts of deferred parking and associated mitigation measures will be evaluated in the TDLE DEIS. Is the intent that the standard for minimum 500 parking spaces "generally structured"/maximum 10% surface parking in the proposed code amendment be met on station opening day of service? If so, this will be in conflict with the Board of Director's August 5th action and could impede overall timely project delivery.

  Response: The proposed code language does not identify provisions for phasing. The intent of the proposed code is that any transit station serving the public have sufficient parking to serve those patrons upon start of service. There are provisions within the code to allow a proposal for a reduction in the required amount of parking; or, by providing the equivalent parking through other means. This is to avoid negative externalities to the surrounding properties.

- The proposed Federal Way Revised Code (FWRC) Sections 19.225.105 Note 13 and 19.240.135 Note 13 address the potential for parking reductions from the minimum 500 parking spaces for "light rail…" How will the proposed code amendment affect, if at all, the processes available for evaluating potential deviations related to timing (phasing of parking), type of parking (structured vs. surface), and footprint of parking (variable per circulation needs, TOD integration opportunities, etc.)?

  Response: The timing or phasing, type and footprint of parking, would be evaluated with each project proposal during the typical city permitting process, and/or as more specifically agreed upon as part of a development agreement.

- We note that the SEPA Environmental Checklist in most cases states that this amendment is a non-project action and that specific impacts will be evaluated at the project level. However, there are some exceptions within some elements (e.g. regarding structure removal and displacement of people), and we wonder if this is intentional and the reason a distinction is made.

  We are simply acknowledging the possibility that with any project there may be the need to remove existing homes or structures, and the possibility of displacing anyone who may reside there.

I hope you find these responses helpful. If you would like to discuss them further; or, if you have additional questions, please do not hesitate to let me know.

Sincerely,

James Rogers
