COVID-19 Cases Among Children and Youth in Washington

November 10, 2021

The purpose of this report is to provide information on COVID-19 in all children and youth, ages 0 to 19 years, in Washington state. Children and youth across Washington continue to be affected by the COVID-19 pandemic. While schools are taking precautions to prevent the spread of the virus, understanding the burden of the disease among all children and youth can help communities, educational service districts (ESD), school districts, and schools better prepare and respond to shifting needs. This report describes cases among all children and youth in Washington and are broken down by ESD regions, and age. An ESD is a regional education unit that is made up of multiple school districts.

Cases are assigned to an ESD region based on the individual's home address. Children and youth with COVID-19 include all individuals living within an ESD's jurisdiction who are 0-19 years old, regardless of where they actually learn.

Key findings

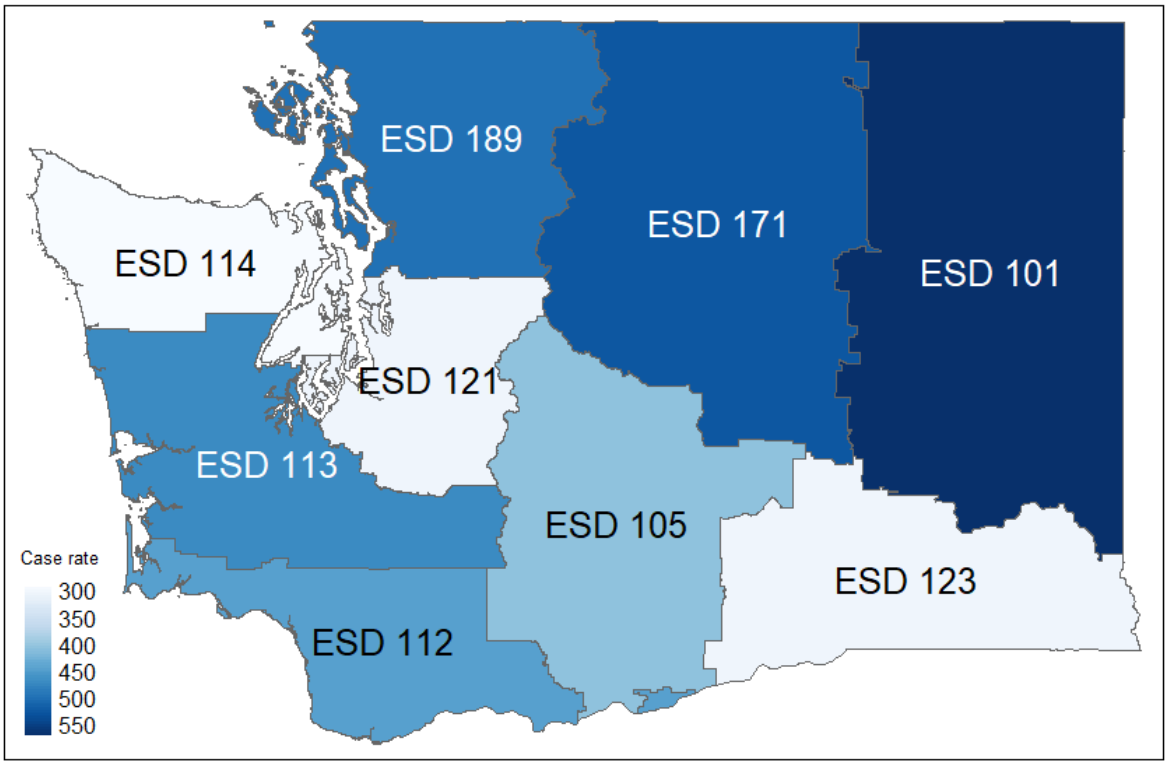

Among children and youth in Washington state from October 17 to October 31, 2021:

- there were 7,412 cases (393.1 cases per 100,000 population)
- case rates are continuing to decline
- the highest case rates were in northeast Washington
- 4-10 year-olds had the highest case rates (458.5 cases per 100,000 population)

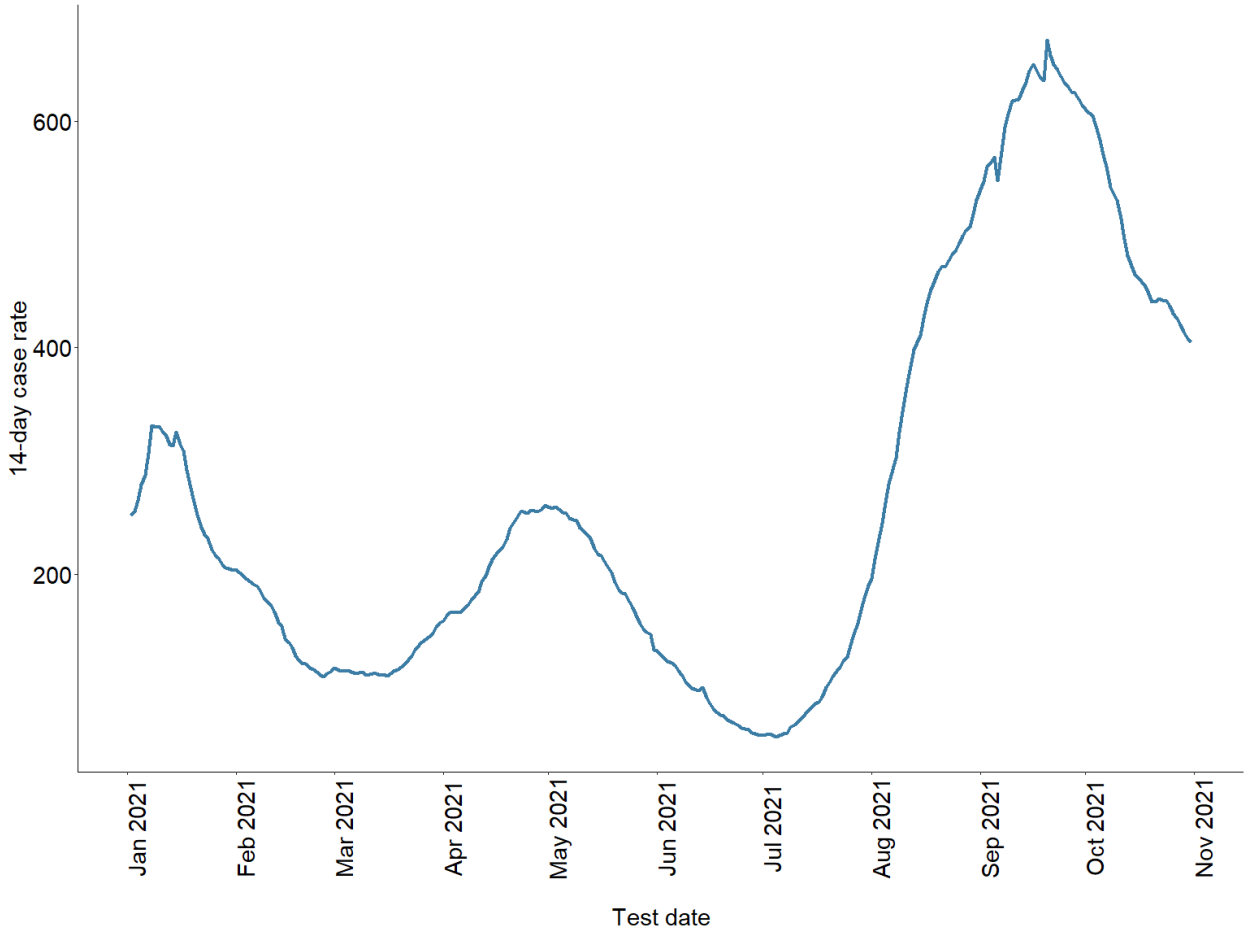

Number of COVID-19 cases and case rate per 100,000 population in all children and youth by ESD region, October 17 - October 31, 2021

ESD	Population	Case count	Case rate
ESD 101	168,583	960	569.5
ESD 105	105,235	426	404.8
ESD 112	162,085	721	444.8
ESD 113	119,629	561	468.9
ESD 114	78,966	229	290.0
ESD 121	769,804	2,333	303.1
ESD 123	120,595	364	301.8

- Case rates are calculated using population data for the specified age group

COVID-19 case rate per 100,000 population in all children and youth by ESD region and age group, October 17 - October 31, 2021

Methods

Case definition

Case data in this report come from the Washington State Disease Reporting System (WDRS). A 'case' is defined as an individual between the ages of 0 and 19 years who tested positive for COVID-19 (by either molecular or antigen test) during a 14-day period. The report includes the most recent complete 14 days of data, October 17 - October 31, 2021.

Cases are assigned to an ESD region based on the individual's home address. Children and youth with COVID-19 include all individuals living within an ESD's jurisdiction who are 0-19 years old, regardless of where they actually learn. This includes:

- students who attend a public or private school in the ESD region
- homeschooled youth
- youth who reside in a juvenile correctional facility
- all other children and youth

Please note that case rates and counts do not represent cases that occurred among students enrolled in a particular ESD or district. They represent all children and youth within the region served by an ESD or district.

An accurate home address was missing for approximately 7% of cases in children and youth with a test date between October 17 - October 31, 2021. These cases are not included in this report.

14-day rate calculation

Rates are calculated as the total number of cases within the specified demographic (e.g. age group) and ESD region with a test date during the 14-day period divided by the Washington state population for the same region and demographic. All rates presented in this report use the Washington state population distribution based on the Office of Financial Management's (OFM) April 1, 2020 population estimates by age, sex, race, and Hispanic origin.
